### 8/22 - 11:48pm

Just again what we do rn here tho I dont know how else to express it...... like that if you read the writings, theirs sometimes more wisdom in the ones without titles.... we could title anything, like writing be in a way like in the same style as music or an album right like you name songs by titles.... an album is a book with a theme.... lol

like I said cant go on forever here, but we could use our writing skills in any other way also is my point.... just since all of this moving, changing drs, on / off meds like losing my job I enoyed like alll of it, im super down and been its as if idk but we know the creator always got a plan in this way of like how life unravels be like how the cookie crumbles lol..... randomly lol

again prob with it all is this all, like meds do help thee in different ways, only med that ever help me be succesful in the working world was ADHD, like and then its all that, like just this is only life we got, aint no1 could be hungrier than thee for it to not bee

### Thee & Thy

like I said tho, idk I just started doing this using thee & thy, alot more often but its the again its in the tablets this way also lmao like its again adds a layer to the paradox of thee writer... lol

I really like cos it makes so much sense to thee and even again like what happened last yr between this all like just its the only thing that makes sense ..... I aint sure what to do here

like just yeah idk we have no choice but again we did mention it here.... like bcos of thy experiences again like how am I gonna or suppose to write over this here tho, like its the master number 515 be... like again I said it, its 2 souls seperated by a line, like the 5 is the soul and the 1 is the line.... their is no greater number in the matrix lol..... =(

the thing is in a way right like its all this paradox to it all, but for the choosen one it would be how it is here...... like idk its weird how anything can influence thee like sometimes your blinded to it but we be mad aware at times like just again these numbers & experiences...... like and why did ariana have that like after like idk not everybody does, fact is, if she didnt like we wouldnt think like this but it is thy only reason like I have no choice and again as far as IK like im being played lol like that everything cant be bcos of this but that is life and what love does like I said just like idk like just all of it idk but its the only thing that makes sense and if we cant do anything about it, but she could like just idk, you can rewrite over the file is what im saying here tho thats the only way like we just only wanted to find the one to be with till death aha and like it aint been like that, again just for something to think its gonna work out like thee ex and live w. her all this, and it to all change, like what can you trust, I aint the only one but yeah this is thy life story.......... like the only thing that again just why is that hows it been here like I aint ever cheat or hop to someone else, like pft , like lol.... just yeah idk life could be so chill and comfy and relaxing in a way if their was any love but their aint

### The Tablets

if we had tho just a little more freetime, like a relaxed mood like how it felt take adhd meds, like we could actually make this more interesting but its hard when I dont care, like the shit that has manifested here and it all, like after all this still like its beyond like you aint even been through this experience so dont be doing that shit like it aint what a friend does

cos to me its all worth it to have it and go back to it and read a story of on your life, just what happens when your left alone in your thoughts..... & just again only a wise person would write, like dont gotta do a thing, but this is what is rn

do you know how good it felt before to have my own place cos I worked hard here, we always burned shit aint been the same, shit allows me to relax, why I loved my job before, but yah for it to go here, again like just its the perfect paradox for ye and im ignored here tho or just not seen, or even not listened too =(

like an entity comes and is given wisdom to follow ye heart and we do and nothing works , lose everything while we find everything

just life again like the whole pt is to find ye soulmate..... like thats the 1st thing to what a family even is tho..... like shit we aint got nothing to look fwd to here ever....... nothing at all, pain pain pain bcos of these situations here and now we dont even have the cure like pft, like just idk im tired of this all here...... dont know how to manifest something else if nothing is free like we be lost , like idk im mad af cos like its always been to me like im viewed as the opposite like we actually be mad wise and nice tho so it doesnt again like nothing makes sense and it hurts thee, like life be short enough already.....

the prob from the start and it all is the tablets, never knowing what to do in life to begin with, its why this happening to thee hurt thy self more.... like thats all, we found something we liked all this, and then this all goes down.......so its why this other thing is only thing that makes sense to how or why but again just like damn why all the suffering here

i mean really it hurts me soo much how this went down like cos like just its sad in a way like pft like now what, for nothing to ever open up here, like just again dont know what to think of it all, but the entity manifested prior to it and again has more meaning than anything else and thats why like as if again dont know how else to view it esp at this pt, like dont know =(

### 8/23 - 10:48 am

| Free Shipping | $0.00 |
| Total | $99.96 |

really we aint feeling good... like just everything thy future, all of it.... meds, every single last thing like ....

but we just bought 3 x 1 gram vapes off of secret nature, again the other sites idk you can find diff stuff but the laws be changing soon, we got tangie pop strain.... their vapes are good, kinda pricy but worth it, easy check out process.... weve had them multiple times before from this place and it is pretty good it aint the most potent but it works........

just yah mainly it is thy job here, like just we been doing 50mg seroquel again atm dont know what to do to be completly honest....... like we barely make income and gotta slave away .... like no lies im going insane here....

but I think this over buying thcp vapes is what is more safe..... like its worth paying extra in a way..... but yeah like dont know what imma do when the laws change, like just the problem here is everything rn like my mind is blank... idk what to do....

I just share everything cos in a sense, like it is all apart of it, the meds, like cos life was good before & it aint been like I aint motivated 1 fricken bit here since all this happened............

we could get thca buds again like just living here sucks the most tbh.... we always burned & it had nothing to do with thy job, but not having a job we enjoy be like hell here................. the only job I liked before was hvac controls tho..... like I dont wanna live here..... like nothing has gone my way in forever here.......

but yeah like some sites again always use a coupon code, 3 x 1 gram vapes for 99$ is a decent deal off this..... and tangerine is like one of my fav weed strain ever like it taste fruity and heavenly..... weve had legit tangerine vapes from the dispo and thats what I mean like it is heavenly, weed that taste like fruit be amazing, a gift of the creator, and again like just dont agree with how things are here..... wouldnt choose to live here in this case.... like weed was legal, worked at dispos doing the temp control..... this sucks................

I just wish it was like this for weed everywhere like you just order online, what is the difference, they already again do it legally.... like shit is a joke out here

like same with shroom spores, can order online legally..... like..... its just living here, like aint the right place to do shrooms ...............

but yeah idk.... like the most crucial thing is doing what you love in life & this aint it.......................... like thy whole story is about this to me here like that is why we always went in this direction........

I dislike people who are against weed in totality, like may not be for you, but drinking aint for everyone either, like im so against it like & idk like that was the main theme of macs music before we listened to back then like again best day ever, light the weed & take off, say goodbye to hitler ahahah =(

its just the truth here.... like that im not afraid to go down here, for sharing thy truth cos the creator knows, it aint as corrupt everywhere but we are a country like I said before.... to let someone else access the cure & not others, just having it illegal is the most corrupt ass shit here ever cause it aint how the game works, good always wins.............

it should be here soon like it said 3 days or so and it arrives at thee mail box lol so clutch tho legit & good cos when I went again we didnt pick up anything from vape shop this week we got the vape leftover but it aint the same like I said so I was and been thinking bout ordering online lately cos it is safer..... now like also 28g of wax like but we dont have a puffco atm the pen makes me cough, like so thats why we went with this route atm but I need something to change here soon, like running out of all things, not making money in life, like I couldnt be more miserable when we are the wise one here.... like again just dont need a lot but some..... like makes everything better.....

this vape does taste heavenly... but I aint have no forsight of the future & thats what your foes like........ but we got insight , forget what song that was from lol........ =(

### 11:15am

but yah idk like this shift sucks the job in totality for real tho like it aint fun .... we always eat around 11 tho shower at 12 and be their for 130

just like my mind having ADHD thy thoughts, would be like, if you had em you wouldnt know what to do either...

but yeah like how we lose weight is just the metabolism, not eating breakfast.... smaller meals & yeah like idk the weight chart proves alot like to thy meds & thy life, and being up their made me feel even more sick like pft but again who does this

like the way we view life & anyone else, we dont have a choice here either........ like shit the world be wild be we know the truth....

Beef jerky is mad expensive these days & so is everything but we aint ever buy chili from a can but I saw jack links jalepeno chilli thats one of the best flavs of beef jerky my coworker shared before up north , swear we repeat ourselfs but its all we got.... and yeah or peppered again be good, thy story of like when I first ate it was in texas lol

we usually just been buying them frozen meals like mac & cheese, stauffers or we buy lean cusine cos its better sometimes or digornia personal pizzas .... thats what we eat before work and then a chicken sandwhich like chopped chicken on bread is what I bring, lunch meats arnt the healthiest either, but what is right like in Jump by durk tho like we did do meal plans from this local place as I said, wasnt frozen, like every week drop off, that was living like a king

the chili be alright, homemade always be better tho , chili in a can is like dog food lol

or sometimes we get I even ate back in the day like lunchables protein pack they call it, just crackers & meat & cheese, fills thee up sometimes lol but on another note yah like just I love subs or like just getting pizza or anything somewhere or like chinese shit sometimes, I aint eat alot we be picky, but not having any extra money, like we aint ever do fast food like that, maybe sometimes, but never like some ppl do it lol....

like its this part of me where im stingy with my money like we rather die and be miserable than let you profit off of me .... =( lol

or like just going to chipotle with my ex, like no lies, it was pretty like fresh food in a sense & we aint do shit lately for real tho

just idk the thing bout the weights is the bipolar meds tho, like that but I lost it all before with adhd but we aint have anything this time & it happened..... but again thy mind cant take thee stress and like really here never was or been looking for sex but that mental alchemy of using nature that is the way of the good tho.......... like life has to be enjoyable, my perspective of this shit is fucked up

### nothing here is true

just again like the diary says, how do you live life.... when nothing here is true, like every single last thing, about how reality is, people live their life like this & like that, but we aint find it yet, like thy other soulmate....... like just idk its the wild thing about who we are, like we do be different and found the answers to the game...... like that adhd mind, like I cant help it, facts its taking thy cure and not having it which is what hurts de most......

its being their at this point in life and then every single last thing being changed but to something worse, like life was not like this in MA here, like it felt more like life, and this is a death sentence living here..... like legit like I said ppl really do get in trouble, go to jail, and come out, faster than how long we been sitting here since 2018 is thy paradox........ like wtf tho, seriously, you still aint know how the game be played................ =( I couldnt be more sad like to go through these holiday seasons and the seasons for nothing to be..... in any way like cos back in 2018 life felt great like oh its gonna take me somewhere like and life has never sucked more here =(

### how can I ever trust my thoughts again

After they told me its this & that & it aint been, like idk if my message gets across, but we try and like who does this like I said.... but the entity who knows more than anything else.... so it gives me hope, but my thoughts rn be blank cos of it all, like we are and have been over writting the files to reality here............ like just as in the author invents the future, the reader has no power here....

but we can do this & be in a comfy position & be with somebody, like itd be super cool & I see it no other way but to like just be with someone who loves being on the computer as much as thee like to have a gaming room with 2 setups be goals lol.... like and thats what I mean this could be but better in that scenario.... but yeah like how are we to profit is the paradox, our story could profit on its own bcos of the energy of it all regardless.... its too much for 1 person to handle here..... like what, the world in retrospective, like the problem is weve seen it, can see it , like how life be when you do have a little money, but everybody makes their money differently.......... like people look at life differently.......... as long as we happy and we aint =(

### all we have is thoughts

likeee thoughts be real, I dont get this, like cos its not like again their is no reason... dont get it at all here... all the wisdom says that... like it would be different it was like a theme of thy life like oh this always happens, but it aint ever happen like this before, again it just like the light cones ... like that not only the past influences the future... but that thee future influences the past paradox..... so when things come to ye, like that is patterning..... its the only one that makes sense.... more than Harry did in this sense... but they both still like I said, both paradoxs have continuued to exist cos of harry potter and all that like I said, ahahah =( like its too great of a mind positioning to be in except they leave me here to suffer.... like that is whats wrong, cos love be automatic, and again dont know what else to believe in, just like I said, with what happened with this person at work, like may be true she did this right like but we did put our foot down on it like energy be like that like I said, aint the 1st time, but again i think its more of this paradox like that you dont know thee mind when you wanna think you can trap thee, like you cant trap something that can walk through locked doors here....

### language is a dual edged sword

bcos its your experiences tied to your association of words vs mine.... like in silence lies the unvieling of wisdom.... in silence their is no misunderstandings like again as if the octopus only pushes an ink sac to escape from the dweller in the ocean.... like that like an octopus skin can change, like that the light level of shit on the human body lol....

like so its all this that we know & being stuck here.... like it is dangerous like everytime weve had to interact with anyone, like just pft.... cos our mind be sensitive to the energy, like intuned with the enviroment, more than others............ just again even being with someone, someone can try to take them right like seen it all here, but we never done that, legit... like cos just its about finding thee one that wants you as much as you want them.... thats the only way love could or can and will work....

### the creator is playing a game

and yeah what is dangerous about it, is again , taking a dopamine blocker you see can reset thy parameters..... like how it says, when they wake up reality reasserts it self & what is , comes into manifestation.... but that is the thing about the red & blue pill of thy matrix.... like just all you can have is a good mind ..... like again just even if someone is this & that, made it, successful, like that the only thing they can believe in is the creator also... lol... and like I said, just the paradox be that everybody makes their money differently, like we just cant sit here and accept being bullied in society, like the day the earth stood still like thy entity says, its not your planet........... just everything circles & we be sick & tired here.... we even write, and im given no relief here........ like what we want, is like nothing, its normalized to most people also, but its living here all this, like again targetting thee, is crossing that line here when a person is in need and promise like we arnt easy to forgive, and that aint my problem, but its yours, like so w.e, cos what you think reality is, is different from thines bcos of experiences......

### Ectoplasm

### Expect the Unexpected

Then what happens when you do...

but yeah I mean we dont expect anything but if it was to be then wed be alright here... like its just like not like I didnt screwed over here in thy mind... not like we didnt have a divine experience here & wrote

being rich in spirit, is worth more than anything else here... you cant buy love...

### No soul is ever lost

JS, really, like with all this on thy plate, like the suffering, thy medications, the thing is they were right before, felt comfortable in life... cos just its wisdom like didnt become stupider taking ADHD meds .... like just need to have a direction to be led into...

like that just cos I cant expect anything so to like again just all of everything , to me, shouldnt be here in this position again in the 1st place if it wasnt corrupt here....

just that like half the problem is the medications atm, the other half is thy job, money, all of that, and the other side is living in a society where you want your workers to be poisoned if nature isnt allowed. like again really no1 cares but its the problem when you try to get a job, like its all a sick joke, cos it do be like getting a job is like picking ya slave master here...... like just we want to make our own way here...

### Aint nobody more hungry than Death

Its his food.... All things derive from Death

well ofc, like aint nobody could match thy energy here, of the dragon wanting to be released here.... like aint no1 hungrier to get out of this position, like we cant accept it, we got 1 life here, we gotta make this happen.... its why we went this way in 2018... its dumb nothings been, but to give on thy dream would be like accepting defeat here, and we do not, we overcame death here

just idk bcos of the circumstances of it, again, to be on thy otherside. like her position js like what happen here is too great of a paradox & like its as if im ignored for being honest here..... like who comes to you who has witnessed this.... like again the creator be testing you.... like I said you cant buy love .... to bond with another human is like all that you can do here....

### merging black holes = super massive blackhole

just writting in this format, like you just we dont gotta say anything, we got thee mind here to make this be... and just thats it the blackholes need to be combined here to form a super massive blackhole

its the only thing that makes sense to thy brain.... and again like pft all we ask is for a fun day legit like to chill, lol, like just you may of used nature but not with the master ancientxthoth.... lol and vice versa, like that cos its the only thing that would make thee believe enough it can be.... easy.... but again I see different routes here...

like just the shadow needs to be the next trend in the game or simulation, it needs to be brought back to life here, the duat and all that.... like could easily add the shadowman into spiderman or make it , its own, but their aint no superhero created that exists like the shadow, like its the only actual truth their is in this game.....

again like just idk it makes too much sense... and nothing be.... like if things actually combined, it would be like again, just idk lol like I have no choice if nothing be free here is the problem & paradox here.... like ..... =(

its as if again, how rare is this to be in the 1st place, like you read all this history, this is what they believed.... and then someone in the modern day writes here like nah it remains like the only truth their is, like you want this to manifest....

dont know what to do, just that if their was like again any sort of coming together here, like just it can take you anywhere, but life be short, and im suffering immensly like when all I need is a psych dr we trust and sees how I see it.... or some thc right like it aint hard to solve this paradox here.... just need ppl to be for me and not against thee like how its felt and been lately.....

aint asking for nothing but some medicine to heal....

bout to leave for work again my mind be fucked lol..... but yeah like just like I said really, you aint know pain , probably do, everything suffers but its that like since thy ex left in 2018.... like all of that happening here, hurtful af, like just its the truth, we aint sleep as good since, just having someone and being with them.... like it aint a joke the slightest.... like we be miserable always now tho.... cause when you sleep with the one you love like just thats it their be love and you can be comfy and I aint been comfy since all of it, like why you think we needed meds in this sense, again just like its like im treated here like I did wrong when I was hurt, in a sense, like we just didnt go to someone else here...... like so w.e

### Super Powers

by Lil Durk...

hmm cant wait to get home & write at this moment.... but yeah like its all this paradox been tryna compile what im tryna say here...

but yah like so just again this is what happened to me.... like back in 2013-2018 basically at my hvac controls job again just like we kept up with music more back then.... like I remember driving on the highway to work listening to this album basically...

but theirs a reason why when I seen it recently in my algorithms we dont click it lol, like it came on twice on my music playlist randomly tho and that yeah cos I aint feel good & he says Jim Carrey in it, again that truman shit, What ariana said on that article was her favorite movie truman lol, like but its deeper than all of it... like how when I got reddit we expressed it all before but its thy reasons, like jim carrey video on reddit which was like that napalm band he was acting crazy in it.... we saw that when we got reddit is thy paradox.... but yeah like idk I dont keep up w. anything or anyone tbh just what comes thee way & yah like he got surgery recently again just dont know what to think .... lol

but that song Super Powers does vibe, but it makes me sad at the same time here, like cos of this all honestly like wtf we do get more sad than you can imagine here at times, like im always alone and we took these sacrifices here....

like that again I just explained the things not said, we said it on X before, but how that coworker Steven was his name, like one of the 1st things he told me was that he was from Chicago you see....... like I kept seeing it my algorithms, like I said he was singing that damn the climb song , and then it popped up on my algorithms like by miley or hannah ahaha w.e but yah ...... like that he knew what happened to me in a way , like again just idk its was inspired me to go back into durk more recently , kinda cos of it, but its always been their..... my other coworker Ben just came back from Illinois, guess thats where Chicago be ahahha like hes from their too again both ppl like they just arnt like me, but like yah idk we dont want friends like this.... so just idk the whole story prob aint told but if you could listen youd know, it is possible, you could sum up someones day with AI basically if it listened to your phone like chances but it is possible is my pt aha like so idk.........

like that I think he was the one who was putting future like purple reign in my algorithms, like believe it or not right, like this is how my mind percieved it all and why im being real here.... like nothing has changed, but its this paradox here.... which again the 1st thing this girl told me who I wrote a note too like that she knew him and was friends with him.... like but she didnt say were dating like nothing, telling ya this happened to me tho like she kept turning me on here.... like just dont know again .... I bet the thing is like im right in a way about Ariana but she has no clue, or that I dont .... lol =(

but yeah like im not sure tho, just it ALWAYS happens.... like how I explained the girl at the dispensary at temescal wellness when it opened right in Hudson MA like its where the razer black mamba paradox was, that she wore a headband.... was that not my WoW name in 2018 cos of it... Headbandz.... and today this girl wore a headband ahhaha like idk working with what we got here.... like its as if maybe she read it, maybe random right, all girls wear head bands but its just like idk she doesnt avoid me which is the thing.... but idk how to feel about it, like maybe she has a thing with the other guy or someone and was just fking with me cos again thats what woman can do, or again im wrong and she wants me and dont know what to do , like just cos I posted that siegfried guy 2 books ago like the recent one and like idk he has a red headband ahahah like just dont know what to think

like sometimes I think everybody knows but me........ and thats hurtful if my mind is stressing so much, sometimes I dont know what to think like I said all we got is thoughts.... like that im wrong, but we gonna make something work out for us either way cos we know how too in a way like but it is always about finding ppl on the pathway, like to make friends with anyone who makes music tho is like key it can be but yeah idk

### Question Everything

then yeah like idk even about this all like I said, the thing here is we shroomed right around when this did go ddown in the past and it opened up some pathway is all, like that we didnt listen here to rob my plug and then do that, but its as if since I cant remember which came first like if they were tryna hypnotize me and it happened naturally w.o that or that like again what if it was seen, what if again ppl have died cos of it taking sacirfices right what else to live for, or is it a huge coincendence, like the parallels tho

but I think it says that anyways like we were choosen cos of this all, like everybody that doesnt do shrooms sees an entity, something else is going on here, and yah I mean really like that how durk is in jail right, like is it actually, or is it all a lie.... how can I know, I dont see him, so I question everything thats all, bcos someone who was wise could reproduce this, and what if it just it worked, like its again just dont know really dont, but its like again idk how can someone get the keys to the city right like he had that once and then this be, like but yah sometimes like again like just idk we know it possible, we know weird things can go down here....... but whats it got to do with me, here, like idc, werent my friend anyways ahahah just that yah like seriously tho dont know what to think , cos in a way, like just between it all..... dont know what to think ahahah like that again just we arnt evil, but if your evil to me like we gonna retailiate here....... call me sloth, tried to wrestle me, like fked with me, thats all.... like he had the gateway just dont know, lol like its fucked, but the truth is like he shared his meds like I said it opened my mind, so life be weird idk lol we are just being honest with it all.......

like that no matter what tho, being open to the flower of life is the key, what if it didnt happen.... it did.... like lol idk we went into all it before ..... just yah like just like 2pac said he aint wanna but he had no choice like its deaths food, like we aint hurt nobody, like but yeah idk , I always said to myself like its worth dying over it, cause he was a douche and to never talk about it, so nobody would ever know, but ofc ppl gona talk like idk lol, like trust tho its all fked like im the one who was his friend back then and again smoked that k2 shit cos he was on probation after and like yah like we went blind, like he was a bad influence you see, we were just getting our eye back, but then right like you read about chinx, killed over beef in the past, like just yeah ahahah like thats why I said tho like just idk, someone gotta do gods work here tho .... lol

its more on thy own family not letting me talk to a dr or being against medicines also, like just its the misunderstanding of experience colliding.....

but yeah like idk like I said it before tho, like the most dangerous part about being prescribed meds, is your dr......... or insurance, but the fact is it works so dont know what to tell anyone, like you cant control nobody but you in this game.....

just yeah idk lol . but again like w.e its that again just idk like how do I know, ppl didnt backfire at me in these ways cos of it, like you do never know is the problem .................. really tho, anyone with money can generate things you see , but the fact is again , like idc it doesnt mean shit, you could generate something & be completly fking wrong, like their would be ppl on my side here, like hes crazy he will fk you over back ahahah durk 2x ahahah but yeah like again its always gonna be bipolar, but its standing on what we did like they deserved it, but again just like again just to how my boss fked me over, what if I was crazy and did something but wed never hurt someone in that way knowing the truth of the creator like that you be rewarded more for not acting back at the end of day I guess lol

cant believe we talking about this again , but yeah idk

but yeah so my pt of this actually was this, like is it all a story, made up, cos we liked quando cos a streamer basically like did this actually manifest, or is it apart of this all ahahah like idk , thats the problem with music in totality, like misunderstandings..... or just anyone, what I see is like the reason I listen to these artists is associations...... like real reason too, like right even durk , cause in a way it was the algorithms, like he says he grew up w.o a dad in signed to the streets, well like just again the person my ex cheated on me w. like he always tried to get with woman but yah he didnt like I said we shroomed with him, like all reasons here..... but we never hungout much..... but yeah it is why again ppl tooken shots at me here, like we just vibe ahaha

like cos these artists are also coming back like gaining weight, like cos they will put you on these meds which is poison, or just being somewhere you dont wanna be, like literally like I said, between it all here, they all went to jail ..... all of it, like just dont know what else to think.....

talking like right durk, tory lanez, fetty wap, yfn lucci, like you can see it, just again but the thing is we just liked music.... lol like not that its generated for me, but it works for me lol.......

but yeah im not sure again we been honest, we just speak on it cos it happen, like what would you do, the entity came to me, like I said you think im joking tho, the entity the dragon came down that day and was like its on.... took control of thee lol cos of reason tho....

but yeah again tho we got shot around this time with a flare gun in my leg which again scar still noticable, like the thing is nobody does know is what it is..... idk like its just like I want my way to be trusted here, cos we can vibe, I just thought in my mind like just idk life be weird like be where we hid it again, in thy X box.... like where was the tablets found here.... in the pyramid, so idk like you see, its like as if being told im wrong for it , but who actually is here...... in a way its why I vouch for what I do about society, like its all this, ppl be drug dealers, all cos of nature, like its wrong in a way, like the whole way life operates, like shit its like a war to me then like cant be who I wanna be here freely, like pft Id eat the magic mushroom infront yo face is the fact ahahahah like cos we know it works....

like that its the bringing of ppl together which causes mis understandings bcos of experience contradicting I guess, like idk just saying, well I always thought like just it would be more dumb to not ever say anything I guess, bcos like its no way to go out when you can be friends with someone and laugh about it after I guess, like maybe nobody was right, but you can change things.... lol like really dont know, its why my way to go is important lol

if someone be willing to die over something like pretty sure its what they should do, but yeah like at same time of it being all in my head the truth is, everything be changeable, what if I was right, like what if in the future something great happens, all of reality has a mindset change like it is possible.......

well I think bcos my ex even said this to me at the end, did you do it, yes, I didnt ever lie to my gf here.... and thats the thing, she thought I was cheating all this, she thought I took her money, her dad came in my condo and mom at like midnight or 2am was sleeping, like but I wouldnt forgive my ex, I cant, or others, cos then my magic cant work

idk we have spoke on this all before, the thing is I opened up here about my truth, I didnt lie..... like it could be, but without a reason, then it aint..... like that just how you know we be real.... like we dont need you.... like so w.e , like yeah but its again we wanna use the energy , we dont want sex, but nature like I said here.... it just felt like to me it was created for that reason ahahah like so id love somebody who showed that, but it wasnt but it still remains true here is the problem, again how do I know, money can generate any illusion, like its being given back my pics which again just could remember easier and thats the reason, if their was like a secret thing going on here where they know thy akashic records, they could use it against thee here, well its weird after this happen tho like we went back and watched shit like cause the energy told me again this aint living, like this is worth dying over here, this aint life, like we be crazy but in a fun way.......

## Watching Movies

just like I said tho regardless right, all we got is right now here, like to waste any time, when I feel like this, be ya downfall here, like just that its how easily the mind is remoldable I guess....... but its knowing just again its like , you can know everything, about this simulation, but you cant know the future when you stay single....... like we just arnt the type here to like get with someone and want someone else, like we want all of ye ahahah and thats it, like cos something again that is real like even my 1st/2nd gf right like love be love & nothing interferes with that like we know what alignment feels like........ idk just all of it, like we didnt have to experience this.... but we did, even in watching movies by mac, like I said this before, it was my exs idea to do that while I was driving like it did happen..... lol, like chances.... cos we aint see the vid till 2018 like when I got a computer cos we didnt only a phone like we always worked hard before and got nowhere................ but yeah like so it may happen alot, but to happen with the only person I had it with js like for it all to be true here, just thats what makes me question like even back then as if they knew or its the future calling to me here ahahahha like back then when we watched watching movies basically ya cos we read he died like around the time the entity came is when the algorithms came.... truthfully when we had a gf we never browsed yt..... until we didnt and were bored here............. cos he inspired me alot back in the day like I said about how life should fun here ahahah like really and yah idk the fucked up part is ppl with money just the laws dont apply like in a way almost like its been around it even before like but everyone makes it differently the universe be mad diverse.............. but yeah idk like just this is what happens when we write here........ we already said this tho .........

ya in 2018 when I watched this video what I was doing was farming in runescape like I said...... cos we gonna watch this video soon cause we writing but hes like theyll always be a way for me, cause I planted seeds, ahah like these experiences tho we just moved from OSRS for like almost a year and botted that to actually playing RS3, and its the same time she had that Nasa song or w.e like I just remember the algortihms arnt always in my face we dont follow her, but it happened like this to me, again just what if like see I feel like this makes no sense shes lieing but what if im wrong, what if I never was noticed.... just dont know, alls ik is the entity be real ahahah why hasnt it been shown more in music .... or this art like they didnt get the full answers like us or have tthis experience and it whats makes moving fwd so hard, the energy be precise, my thoughts again like not that I have a choice, but staying single be the only way this can happen maybe not when it happens but until like just dont know, its halfway true like anything tho....... and yah like why do you need to find another woman, when you got the 1..... like it felt like weve had before you see thats just idk ppl really do go around having sex all the time like not us, weve used nature... like pft we aint no dummy here.... mad wise.... lool

like that is the thing, w.e its all about right, like even him, he prob again had it way more before her, like just we didnt.... I said we different here, idk it is possible, the only way it can be is if your thoughts again paradoxes, might be wrong, but we can hope for something better, like what is anything if nothing is free here lol and even her like to me that shit be what we fear, like cos its how like it happen with my ex, fell in love with her after legit its why I asked her to make it official on that date....... lol like that it kills ye as a man ........ again how you playing like imagine if my records be alot like it wouldnt be anything special have less meaning tho, but at same time, we gotta make something happen again like eventually..... lol

like theirs a whole ocean of different woman .... ahahah like for me to select thee, like shit lol, the person who knows this truth.... just idk like what to think, what if im just right, im too wise or im completly fucking wrong, but my thoughts be on point.... like we just ponder question things w. reason I guess

## the difference is

that we just again like we chill, thats how dumb shit manifests by misunderstandings like when you with ppl shit happens like cos the group mind thought process , like lol

but yeah so the way this started today again my thoughts went this way

bcos.... super powers came on & becos it was as if random im like its time lol song sounds good, reminded me of the good days and yah made me question all things again ahahah like its prob random, but its true at the same time at this pt in different ways.....

I just even again , if we gained any popularity like shit we using that in my mind like to get the word out ahahah like that this is what real, like Id use what I know to show that on my skin, like or the dragon flying and like all of it, the shadow for sure lol . but where would it take me, like we need our adhd meds lmao like its the only way..... but yeah .... like we are so alone alot like but idk the wisdom says that, in books of Osiris like believe what you want I guess, but its why thou was chosen here, bcos like idk why did an entity manifest... like for that reason in my mind, nothing else adds up, like the wisdom says it all, to prepare them , all this / that aint shit happen here tho yet ahahah =( like but yeah dont know honest......

it was such a powerful event ...... like what if this happened to you, its as if its all the reasons like I said your being tested, not me here if so anyways, again dont know, cos all we got is thoughts, like the last thing imma do is go after something that aint here, like but until anything changes like dont know what to think.....its thy most cursed paradox.....

## Blessed with that Curse

like fetty said once, put me up 1st, been blessed with the curse..... lol in my squad, again like wtf just its mad weird our pathway from an outsider that has no clue to our reasons.....

the things is like yah idk say it was true, I was right, but that we also broke the game, we ate the flower of life, like you cant 1 up the truth ahahahah like just hmmm dont know, like everybody is weird af to me also like they arnt like me, they dont question shit or write as hard as thee, like most ppl like to me, find a way to accept reality, like I cant, like its why we seperate ourselfs in all ways, but only what can be , is, so idk lol....... =(

just feel like in a way again idk some of my fav artists like why we go back alot cos their aint shit like it dropping these days ....... like this alot of it was before the entity, like again just idk motivated me more than other shit, its what we know lol...... it vibes so it works tho in a way ....... like just yeah like in my mind, 2012 brought like good vibes to the planet in terms of music before and after and now it sucks, the world sucks ass, cos my life sucks ass like just its like you cant accept the actual truth to me, again idk like we could be wrong, we could be right, it could be in the future so far just it aint been yet but again just idk depends on reason........... like thats why it wouldnt work tho here in a way if this was like pft I aint even listened to here wtf never be with someone like that tho lol........ =(

thats how we write, like in the freestyle method, just whatever comes here to me..... but yeah like making a song & freestyling be diff, like to come up with it all you need space & time lol...... but with the meds, like pft easy like in a way with thc lol.... =(

## My thoughts be like

I just know like just my mind be going wild cos like we writing going off into another dimension here, then I look at my clock and im like fk like my life sucks and yah like just I dont know what to do here about it all, like just well to call something bipolar here, like that aint even close to the truth here, that is how energy works, everything is magnetic.... like just yeah bcos they dont speak on this truth iv shared here which is the real problem like we know we be right about nature and do it anyways, its not having a friend like thoth says tho.... just even to get me outta here like when I had my own place like but id just order spores but still like to do and do nothing with it, like to have to go to work like we need something better to be here...... lol just when we had time before when we followed our heart and had some money, life was chill, didnt need adhd meds as much if I had weed if I was just chilling, but to do anything like the meds do help unless Im gonna be useless, like no dopamine .......... but yeah like just cos I dont have a psych dr also its why like we stopped taking it also like insurance changed all that, like all this that happened, its beyond stupid like if you asked me like they fucked me over for no reason at all, coulda been worse coulda been better........ but yeah like its 11pm how am I gonna sleep tonight, like we keep going into work like this isnt gonna work here like for the rest of my life you might as well put a bullet in my head , or yeah right like pft rappers who have died being shot, like just I dont thats what I mean like everything cant be faked, but I think some things can be.... esp if they hide the truth like just idk the whole world be changing in everyway of computers, entertainment but at same time they tryna fuck you over more the avg person, if they wanted you to win here theyd allow shrooms , like atleast have options other than thy poison here....... and tablets say it, so I dont get why it just aint chiller , atleast decrim also like shit be dumb af out their , like you can enter a cheat code in the game like really just 1 mans fun is another mans hell , but all things be bipolar like we think too much lol like life just is....... but yah how tf am I gonna sleep tonight, if I keep taking it is gonna be harder to sleep esp not again like its all fked up my meds and why this happpen but we got reasons , like its why we write cause we know what we know, like imagine even if im no1 right now, when I die or if I did like bam hes got shit he wrote like sometimes life goes like that or what if something like it is it, like you can always use that towards something but to keep on suffering is dumb cause this can be done without the suffering like being in this situation is all thy problem what else like living here, pft what happened, I aint have no outlook here........

really like 50mg seroquell is prob just the same 2 benedryl but still taking it when I cant get more sucks like dont want things to change in bad ways again like how this happen more, shit if ppl didnt test for thc cos they scum bags of the earth wed be alright here........ lol like really even if ppl just do it, the process be corrupted af to what the good and truth actually is...........

but yeah idk gotta make a choice in like 5 mins lol, the fked up part again like we warned in a way also here like just the weight shows this happen but we still need to stay down.... but its legit like zyprexa makes you not give a fk , its also how we got here....... lol like just idk nothing be free here thats why its bipolar, not cause someone judges an instant of quantum entanglement, judging someones story is weighing their words, like the world be corrupt but yeah like but we have a story here , like its the total opposite of how everything works like me, lol, like that in my mind it is that, people are stupid af, like atleast we speak on it, I could be dumb af but again like cant do it here, like pft my dogs would drive me insane , legit tho, like that to me is fun tho like its super potent wtf lol

the fucked up part is being right on it all, I got records here of whats happened since bipolar, I aint give a fk, like im isolated, but cos of wisdom also lol like without reason would be insanity, but this aint but even if my thoughts , like a friend would make you feel comfortable

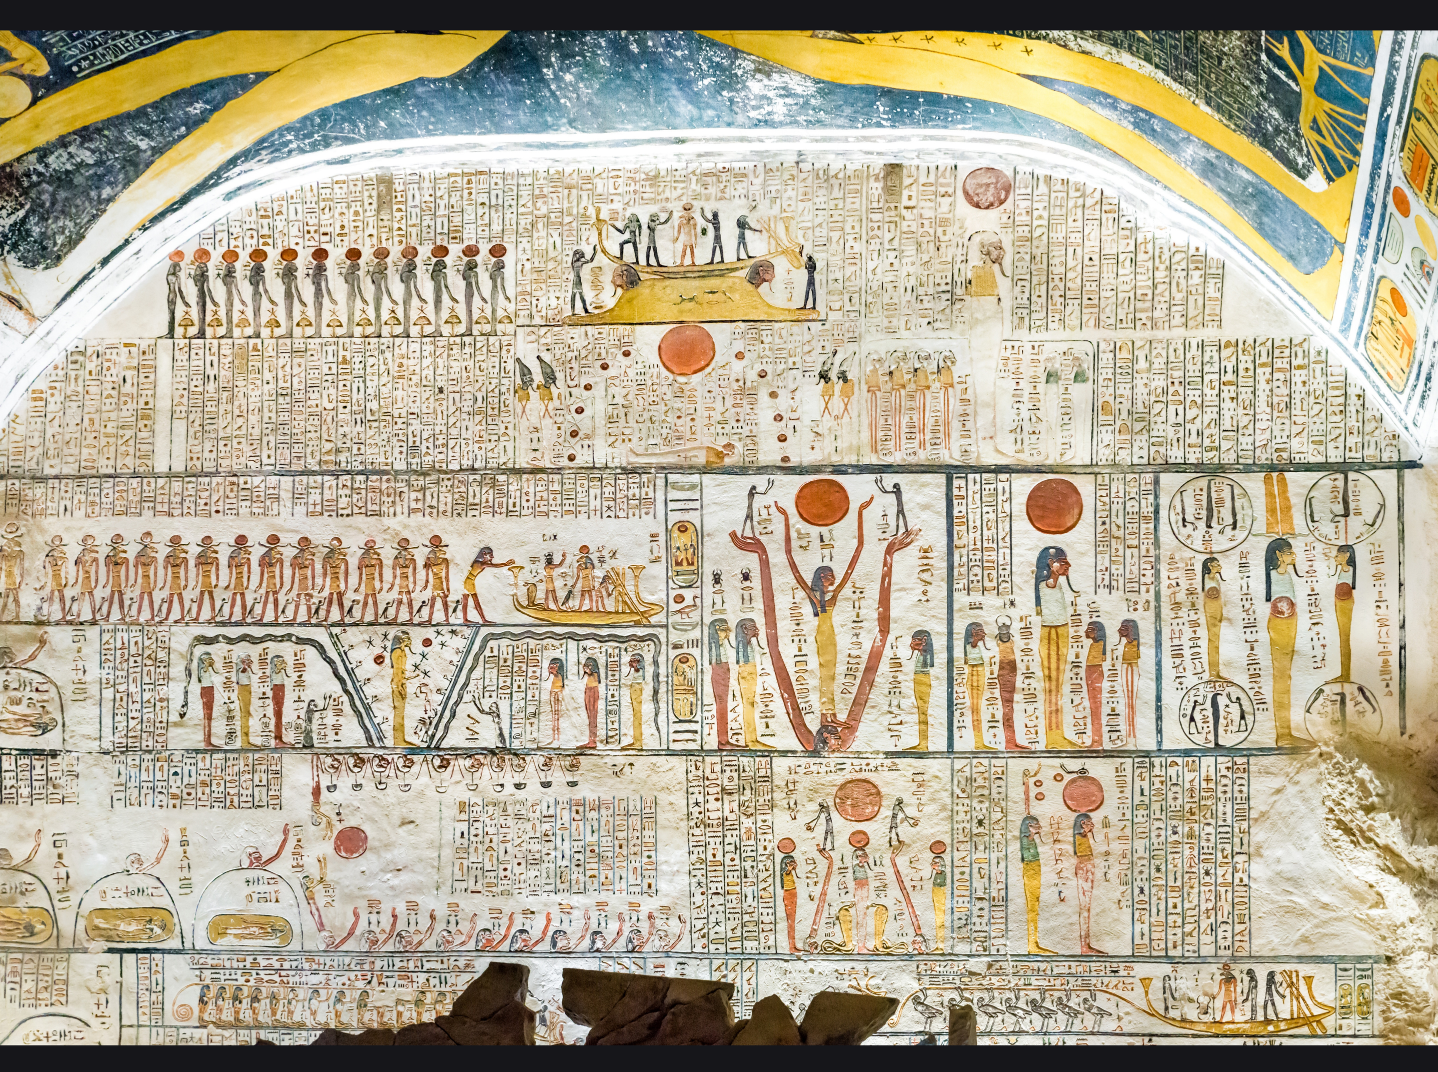
## Nightmares

see like we are the child of light and if we have nightmares, your gonna give me something to vanish tho raise the sun power like the glyphs show, like thats what a good person would do you asshole legit like im pissed, like thats all their is to it, idc what the law is, this law is the creator here.... just wish the world was different honest, like really we can be evil here too, but that aint the way like just doing it is the way eating it or w.e lol like =( just that we use it cause we seen pain, we need it, its our medicine, like we aint ever use something w.o a reason here, like just its the best thing someone could want, pretty sure like ppl do it all the time, but I aint but we have and thatd be magic, everything has its time & place in the game I guess but thats the truth, like aint gonna let someone miss out on this at this pt like its happening, gonna eat shrooms lol like a day set in stone lol cause if you dont know your own mind, like pft the mind is all their is, its why im so weird in one way like cause we know, but everybody thinks they know is the paradox, like nothing is free, so what do I believe in, the entity made me fly out my body, went into my body, hmmm why would no1 express this tho, like just it has been but not always, like never as precise as thees here..... just dont know like its fked up this is what we know and nothing is, like I just come home miserable af from this job wishing I didnt exist basically like if this is life here, so we use our imagination legit like lol gotta find a way out , this process of waking up & doing the same thing daily even at my last job, like that is slavery in a way, atleast we try to fight our way our here, thats what the truth is like it wants to be set free, lol cause the others dont believe enough................ just idk again whats 1 thing to somebody is nothing or everything to another like , without pcs it wouldnt be possible to connect to anyone like it was before...... like just how the games changed is how you can play lol

## this glyph (glyph of the moment)

I mention this one alot in ramsesses again 1st thing is the 1st gf like just thats what I said to her, ab-ram-of-sky and then their ram gods also pft chances like I didnt have to have this thought... I thought it when we dated like a meme back then lol.......

its this part also like the whole thing cool but at the bottom, between the rocks, middle left
like that also shows the entity the shadow merging here.... like lets zoom in lol



## the entity merge

but yeah like it looks how it felt like the entity, the thing is like we noticed this in our image, like I forget atm before I think it may of been after I made my video like just that it proves my pt of like how the entity went into thy body.... just idk its cool to see a glyph on that exact thing.....

its called syncretism in Egypt, how 2 entities merge though like pft the thing again idk this happen twice, like it says that Hermes, wakes them from sleep and again like he has made them mindful, and im looked at like an idiot in one perspective being stuck in this position atm like why we dont talk i guess much

we finally decided 15 mins later, like just gonna take the 50mg seroquel sucks my meds arnt right this happen , like but again what works does here its dumb af, like that idk to sleep like without nightmares be nice, I hate fucking dreaming legit cos its just weird, nonsense, like love just nothing happens and I wake up like ahhaahaha what weed does..... like really so peaceful , cos my dreams be weird af like anyones.... unless its the entity which wasnt a dream, wish thatd happen more like shit be rare af

prob gonna have to stop taking it again, we used to take it earlier, we again titrated down like every 1-2 weeks lowered zyprexa by 2.5mg then we took seroquel like we had 2x 90 bottles like basically but by chance also but yah like nah it was hard af to sleep like that, but it also felt a lil better but it always felt terrible.... like even worse cos my situation, my situation still be like just to do something everyday like this, just end me now pls like whats the pt tho .... =(

ya idk just rambeling rn but we finally gonna eat something small like again idk we aint like before on the meds impossible like just really, but cos of all this plus writing, plus again my paradox be fucked really tho , like just idk we need to make something happen at this pt in my mind or nothing ever will like we bond with our soul, we find wisdom, nothing ever changes here, like that is thy paradox, that we know how the system works I guess, weve taken the meds not eaten like ofc we do, its that other shit and just like idk we never believed it like just it can be haha like idk

like idk cos thoth in a way says it be a key like you do this & something may be.... like just idk we know too much like I said, but just life has its time and place and reason, and thats all their is, like thats why my mind like its worth more than what you can find ..... lol aint nobody can tell your story for you either, like nobody can know your thoughts, we play fair, like we set what we know into cyberspace like aint noone else some but no1 with a real purpose in my mind like idk everyone was born for something to be , just gotta hope the creator hooked you up i guess like that it likes you but ofc it does all this suffering be nonsense.

## take it for what you want

the thing is like again nobody writes like this , just we do know something right, like life sucks , the fact its exists be a paradox like idk its in cyberspace is the truth like anyone can find it...... lol what if again like just idk like imagine the truth existing but you cant find it..... and here I am.... lol like just cause everyone talks about nonsense, we only speak on this truth here

could again like just the fact is nobody writes like this their own consciousness..... we do cos we can, what else is their do rn , cause to me it just it does feel like that tho wether on purpose or not right like just that the calling be their lol.... and like yeah idk.... like just like its a truth too great for you to get, like that the entity came to thee and yea like just idk to me again, why make it everything, cause if you knew the truth like that fact nothing is free and im saying thoth descends into bodies right like its not just make beleieve oh this is the truth, nah this person comes with this truth like I saw this happen, nobody shows what I have, but again in ways never as accurate like as if again, they just didnt get the picture as we have done like pft a legit 60 second moment in my life, like why would someone show it, like super cool it defies all logic lol really does in society tho

## this is who Thoth is, his mind

like that someone wise would question everything, thoth asks ?s right like.... just aint noone closer to grasping that vision and expressing it in my own way , lol like just know we be right tho, like to say it how I have about everything, like just how light does work, like believe it or not , its way too intelligent to begin with, prisoners to our own coding here..... bots running on a script right like that is the truth tho...... like we just say it & take it their, put it in perspective, it be the truth, we knew and thought and questioned the maker all that time ago before anything else happened cos this experience, we always thanked thee creator in his way of him showing me like the truth even right like thats the problem life sucks rn

like even thoth again like w.e it all is, just we could turn into an ancient person and leave writings, ahaha like what if again, idk the problem with this truth, of thoth, is just like its as if the highest lvl of thinking like that its a paradox, it states the truth, the shadows created beings by the voice.... like or is it all an easter egg like to exist now & not then ahahah we are like this tho that aquarime mac song cos we vibed to a few that made sense tho like that we heard in a way but not all of it, dont need too like but yeah ....... just dont know, like cause like I said the thing with it all is mentioning it, but its like .05% of this truth in totality here, like we have others , but songs can be powerful to your associations..... like just pft its like rap is spells being thrown at eachother, like listen to psytrance right like it doesnt bring in any bad vibes ever is the difference.... lol like words be powerful, we can cast em we write em we dont try to do that, cos we know we can anyways if applied.... like just yeah, like just wanna be set for life & not have to worry is thy dream, doing something I love, like that is all ahahahah and to be with the person I love obv like we done made it close to that before in a way already is the other paradox

cause just telling ya rn, thoth wouldnt know this truth if this wasnt how it was..... sex be magic is what he says..... 5.... like didnt I tell you regardless its all I got like cos just was young but my 1st gf did that to me like its why like this manifested like this, we avoided her cos we wanted her ahahahah like cos that is dieing tho legit..... and yah like never did anything but it happened like just idk its the fact like idk who else is gonna tell you 5 be magic, lol........ like just the fucked up part is being right on alot here.....

## Osiris be asleep & Doesnt Know

like we are taken for granted, when you couldnt of asked for someone who played better and followed that pathway of wisdom , like just yeah idk like cos the thing is, like egypt is very expansed...... to remember all of it, to see bits and pieces be cool at times, but yeah its expressed the same but differently, like just idk super cool.... like just any like I said here, the limit to being a human in the 1st place tho..... like the entity be that limit... lol like you cant have anything more going on in your thoughts than I do here........... but yeah like just idk this is the only way we know how to play like this game, by basically like not going after ppl and just knowing how energy works which again on the flip side it is risky buisness like cos when that curse falls upon ye like we just experienced it before, like ahahah so dont others but we aint playing around with it after 1 mess up here like if it aint set in stone it cant be it like its gotta be it naturally and that is again the fked up part of how this been like shit we didnt talk to others we went this way cos of me, like it all be working up to be something, could be, like dont know, just if you aint wanna be with me like just its gotta be the right space and time also tho like thats naturally like lol like just idk this whole fucking thing be a paradox, cos of whats been, dont know what the truth be like it says Osiris be alseep & lost his ability to know, like aint that the paradox to have this wisdom, like the fucked up part is pting out the exact info like that like having that wisdom here, like just cause, nothing again 1 ups egypt tho... lol like the answers be , and yeah just idk

the fucked up part is again, just what if it was, what if like you dont know until a line is crossed, you can believe what you want like the matrix tho right like...... ppl could know, at same time, ppl could have no clue, nobody may have a clue, but if it was and wasnt talked on like it would kinda in a way tho of reverse psychology like cause this to be is the problem........... just again like we dont know ahahahh like its so fucked cos when I write it be the truth here like shit the entity is like how cool like all this is like just again, just wanna like be on an island see the ocean when I wake up, pft like id sell my soul for that to be tho ahahaha =(

## Thoth always find the Truth

thats again the other paradox in highlightening the message of the book here even tho we done talked about it, like that is the paradox, if thoth can always find the truth like he even knows osiris doesnt know like a paradox within one like ahahah but that being ancientxthoth like see its that truth like the entity knows in my mind

but yah I mean all of it, like the eye thing how again I posted that on my YT like thoth protects the voiceless one and removes the viel of clouds protecting the entity basically like that being bcos I said to protect thee a black hole in thee life tho like how can you resist thinking bout this to me here like what a black hole does that aware winning thing, like impossible for an observe to resist the rotation of a blackhole.... like space & time reverse roles in thy mind, like thats again expect the unexpected type shit lol

but yeah how thoth finds the eye, avenges on his enemy, like all that, is the other truth to again just how we ourselfs aquirred that like we can speak on it and again if the eye aint the other half of the entity like who else but me has thee experience for it like I speak on is the problem here.... like w.e it all is right, like the misunderstanding can generate thy story, like cause thats all anything is in the 1st place, like you know we just in a game rn the child of light within thee says ahahaha like really we always thought like this cause of just again growing up when I did ....

## the book of Thoth

even that again like it says they stole the book of thoth here, my point again here, like pft, said it all the story is too accurate here ahahaha like but yah mentioning again the silver chest..... that was harrys last name, like a silver pharoah, like idk the thing is here, its the only 2 ppl we really wanted like no1 else makes sense atm, of it actually being like dreamy, cos its being stuck in this position, like we can if we looked or thought or tried like that like we dont, life be so diverse it all depends on ye lifepath like really, like I aint think of anyone more of like I want them than harry or ariana but ariana less again like cos its less believeable but it is possible.... like cos again the numbers, the entity, what else do I say tho, again we taking this route cos if it was like chill listen yo like trust this path dont need to be like just idk nature changes everything in a way but yeah like just its that, like it keeps manifesting to me and even if someone else likes me, like again we could try for anybody, life be weird, the difference is we aint like , like lol, but yeah........ like that this happens but yet again my reason like that again it seems like so but it aint, all I do is write & suffer here............

dont know lifes been awesome, as a kid, like awesome, like anything to not do this legit like wtf, your crazy not to do anything to make a way but how like if this be our gift in all ways like just idk the world again if I was tryna profit on ppl is the difference like just idk we wouldnt speak of this but everyone views things differently like it is thee paradox...... just again just how its wrote, consciousness in gateway be just the parameters to manifest a specific reality, like that it is or it aint ahaha like that again their is nothing you can do is the problem like really imagine being here and being tried to sold like just idk what to do in life really like we already be the greatest actor in this script here, like life is that, just thats how we always remember like just being moved from the other side here lol.... shit move me somewhere good....

I feel like yah idk take it as it comes right we aint even listen to that song by the doors just the perfect paradox was finding them cos of the reasons like my sis went to his grave and all this happen to me here lol like mad long ago too but yeah its how much we dont talk and keep to us also like hmm like I said this cant go on forever something just needs to change, like we dont need to explain ourselfs like it is or it aint, and aint nothing been yet, like just again what does someone like me do with this experience, aint ever know in life what to do just that something will work out I wish it was this all like something better than this like =(

yeah like thoths curse is that tho like you read again it says it teaches them about the secrets of the Universe & that like idk blessed with the curse I guess like that bcos as if how life is, knowing this truth, is like wtf, wtf would you do, we know we be right on a level, thats just what thee said like the mind of thoth would be like this aha like that voice in thee head like how the lord of wisdom, thoth, holds thee, by going inside, like the creator talks I guess, thats how thoth paved his path , like his thoughts told him to build a pyramid, what a paradox like aint nothing more authentic about the truth but that it is real, everything else again idk like the thing is we know too much why music works cos its that thing that everything corrupts like life could go in any direction, at same time its like just yah

we listen to this song super powers mad times since driving to work it coming on like we do that sometimes, again hide the videos on side, delete it sometimes, sometimes stuck on something for a min, its just that thought I just had, this song hits me like 2016 like just again life was good, so its this paradox again just like again ppl go down sometimes, but they also raise again like nothing be true cos if it aint in the script of the game it can never be, the truth is that their again obv is something that puts this into motion here, and thats whats fucked like to be stuck inside this game here cos it does take 1 other person also for things to change

like it reminds me the times when me & my ex were close af, like I might not of listen to it alot back then but we heard this album , cos again I could at work ...... and we aint again alot of it is the fucked up part of how it also be like algorithms these days, lol like it all happened w.o it also

cause life was sweet before like just idk nothing had to be anything so why is it anything like life be sooo weird and I want something to change ahaha like this was durks prime in a way like but I say idk life be weird, like yah just the artist can set the tone but once its in the books you can play any song like shits what fked like cos every1 does listen to music in a way some dont care as much but most do like lol

we done so much writing again not even this much when I had X, but yah its about 1225am rn just everything to the meds, to lviing here , like I legit hate everything bout this job but nothing else will do either like we were satisfied tbh the 1st job or hvac controls like we liked that alot until we didnt like until my ex like until this went down like shit changed af like aint no1 I been closer to in this game yet, but still like pft just like yeah idk its llike alll this again we just know I guess .... experience dont lie.....

hate this so much forget where I was going tho

its just like the agenda of all this, be insanity, but fun, like we wanna have fun here.... in a way of laughing with thee other............. like that really to me, that makes me happy like I said to feel good and just not have to worry in a sense, like we dont even know what to do like wtf.........

just dont know here like again to be where I was to this again it like says that to thee, like oh something else was, and it wasnt realized, like the parallels that manifested when they did kept me on this path like hmm lol like but I just explained thy paradox of it all, like even more reason it makes sense & its the opposite like ....... lol....... just again idk its how we played like I said, didnt have to be, coulda like that why thy worth aint being respected rn here like lol just idk like you can look at life how ever, shit really do be like, not everybody thinks like thee here lol............ =(

just dont know like again imagine like it happened to you and like that just again just idk the fact we again fell down into this and harry existed its like again the paradox of the paradox of all, like cant nothing top that which says like thee was right here either way ahahaha like im so mad cos like I said we really dont look like this is thy experience ahaha like that we just had to like her....... like really all these thoughts of like oh maybe the one bam aint nothing be like idk like and again just dont know, just wish life was different like all this and nothing at all is the truth....

like that life felt pretty good like in a sense of oh this will work like no matter what, like our heart was like yep and then nothing been, like just like I said the world do be mad diverse, like just but it is a game like idk, like that we felt mad good about life back then compared to now, and last yr like we aint ever feel this bad for this long here.......... like just moving a huge change in thee life, like really it aint like we moved with my lover here like all of it, like just dont know what else to do with thy mind aha like im soooo fucking like stuck in dumb shit in my mind like that nothings been, legit why am I here then... im not appreciated..................... like in a way tho............ something woulda happen if so then

## 2018

cos its like 6 months tho the entity came, like after this happened with thee ex tho in march 2018 then september 2018 is when I lost my job but still we felt good about like oh life will work out like I didnt do anything so it has too and yeah like we felt like super happy regardless like we had our own condo like we were chilling like we understood our job was licensed and all this went down, lost time, lost income, like pft just its when we got our computer also like idk just thy paradoxes to thee mind, even again, holidays up north or seasons right like this sucks like it sucks living in this place just cause like its not fair at all to thee like ya life could be worse, but it didnt have to be worse in the 1st place like the reason this all is, beyond my mind I just want life to work out here

weell think of it in the way again adhd meds do act as a catalyst like you think better, you think this is it, life forever like we gonna crack out here without nothing here like adhd meds and work okay ill be happpy and not stressed work, like w.o it it sucks ass like the tablets say that thee tablets opened my mind, but for thee better its so crucial to me to be like oh I can take 1 and feel relief, we did it for years, what happen here is cruel af like not practicing what ye preach but changing thy mind which be evil like adhd for life tho like the tablets will never not work on those it works for like it was a miracle, this is beyond misery and pain like again knew ppl didnt like the way it made em feel, but me im like damn i feel wise aha =(

we going to bed were mad tired zzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzz

## Secret Nature

Was just looking at my order just woke up my room be hot bout to go back to bed here but yeah Iv said this before I think like why is this the paradox here also like lol, Cant wait to these come in tho lol..........

forget how we found secret nature, prob reddit tbh, like awhile ago and we noticed this I remember, just idk what a paradox, names in consciousness .... lol

Please do not hesitate to give us a call on 707-309-1008 or send an email to cody@secretnature.com if you have any questions at all.

Many thanks,
The Secret Nature team

## 10:30am - 8/24

dont know what we gonna share here tbh like we shared it all before

but yeah like idk what to do in life im mad tired rn like if I had ADHD meds rn we be alright and we not alright, everyday its the same shit like this is why we took the meds in 1st place, it helped me....

maybe share it all again its prove a point here like im not sure my mind be blank atm lol =( doesnt feel good at all here to be stuck in this paradox here

I think again its more random & this happen either way cos of the creator like that we took this path like just we dont know, shit what if we didnt eat flower of life like thats the difference... like our mind can be like again it takes 1 time, must be open to flower of life like what a paradox I guess and again just society be wrong, doesnt want you to win or feel good, is the hurtful truth....

could be partially again might not all be but it may be part of the paradox like again just thats the thing lol.....

just proves how like everything be connected & how again as if nature be the key to understanding the simulation, like the level of consciousness be similar, and on the same plane as if.... just like yah idk everyone aint down like me, to use nature in a way that benefits thee and heals thee, like some ppl want nothing to do with it, not me.... like that is fun to me it can be, it can be again the best day ever type vibes , this aint , like but it is what the good is, like thats the problem here.... like these formulas work....

like just the thing which even makes a song good is the beat.... like without that again like but just yeah idk its weird how the game has changed to even just 10 yrs ago, like shit , its been 8 fucking years since the entity came like life aint changed here cos the truth dont change I guess....

but it still be like I aint be giving that opportunity when that all it can be like .......... w.e thats why again it can go down 100 diff ways, but we choose the best way here, like again the way we thinking here, be genius, like its the best way for something to actually be, its thy only hope atm , but it makes perfect sense like again just the entity coming be a key and thats ignored here.... like that we wouldnt want it to manifest in any other way..... bcos its this way that would make it work..... like again dont know what to think, if this was the idea all along, or im that crazy, but it seems like again the only way we know & it makes sense if you think about it, but yah like just again, if anything be possible like its stupid af to think like it cant be then it cant be, but if you think it can be then it can be.... its the only way I guess.....

like cos we aint wanna be here anyways like it be our food like something worth eventually dying for to live ya dreams here , like anything else doesnt matter, like you cant let the fear of death here get in the way, cos death is the answer to life it self, like the truth again, we are in a game, like how can anything get to you here.... like death is an illusion & saying that here, when this happen to me, and all that, like idk , couldnt of asked for a better paradox to be presented here like it just feels like im not respected in any ways here at same time........ like but if it was things could work like lol, cos aint no1 hungrier than death lol.... but its thy only life and only chance here also like dont know what to think, lol.... just no1 has my energy and consciousness ....

## all things be changeable

and thats just the thing about the truth... all things upon earth be alterable ... like so just again like may be like this now or been like this but when ye come together with the one ye love like things go smoother than all this here.... to actual feel comfortable, I guess thats the thing about this whole paradox in thee mind.... like again just this aint like following the pathway of wisdom is just what thoth says, using nature is that.... and thats what not is here to the extent where it could be..... like it can be tho...

## over writting the files

I guess thats the key to thee whole paradox, like whatever this is or can be... like the key is this... cos of thy experience, without doing that.... without including 515 here like shit always gonna relapse here.... bcos their is no greater number... like it means alot to thee in thy experience & just again if Ariana didnt have that.... we wouldnt feel like this, its all things combined, again doesnt have to be, but it can like IDK like cos all this tho be one sided & not love tho

## Numbers

but yeah just we wrote it out tho like its the only way, even again thy 1st gf like her birthday was 3.15 and we dated 5.15 like the only way to change this is to use thy numbers in thee favor..... like cos if not its always gonna be like this.... but to use that fact to the advantage here cause its how you know alignment be real..... like without all this, we wouldnt of loved our 1st gf for ever after , like cause the numbers, maybe it happens with every number but this is how the game has manifested to thee..... to over write the files so when it manifests again, like now we have a new association to it.... just like my life happen automatically here like it happen randomly is the truth but its the truth how it always guided thee here...... even again just like to chinx song numbers right like its too much of a paradox here, but still nothing has to be here.... like its the fact im saying I heard numbers when I was with my 2nd gf and like we always knew like 5.23.15 was my 2nd gf and Is date, but 5.15.08 was my 1st gf, like we never told her this, but she might of known, maybe didnt, but it happen like randomly, like the only reason 5.23.15 was is cause thats the 1st time I had sex in totality, like........ so it was random like it wasnt planned out except by thee creator here.....................

I think the only way to over write it all again is to have 5.15 be the number..... like its such a twisted paradox but it proves thee point here & thoths point how 5 be magic................................ and thats all like that is the matrix...................... like so all this suffering like either way its why I get so upset like cos theirs nothing I can do about thee experience, I even shared it, like for that, should be rewarded and im not like all I do is suffer , take the wrong meds, dont feel good about a thing, shit feeling good id feel better, like being with the person you love, makes you feel better, like .....................

## lifes a game

hmm just dont know tho like I like writting in this way of like giving it all we got in our thoughts, making chapters, cause it explains thee story.... like but again their aint a difference to making albums say and giving songs titles, like what the artist does, like so what be the message we tryna send I guess is the question lol, like idk what else to do again here

I hate this job, I hate the hours, hate not having 2 days off in a row, hate it all, like 130-10pm.... shit we go to bed late like 1-2am and wake up 8-10am like this shit sucks..... super burnt out cos of ADHD again my symptoms are ignored here, oh give him bipolar like make me more tired and sleepy like gain weight like their aint no love here anymore....

but we gotta go get ready again its like this be the most evil thing in the way of how it manifesting here, like legit all we ever had was love and got screwed over, I get it, cant get with everyone you love, but the fact this happen to me, the entity, like I dont know how else to view it , like it happening , is the key and nobody recognizes that, like again being stepped on instead of their being actual love like actually sharing with a friend, theirs none of that here in totality...

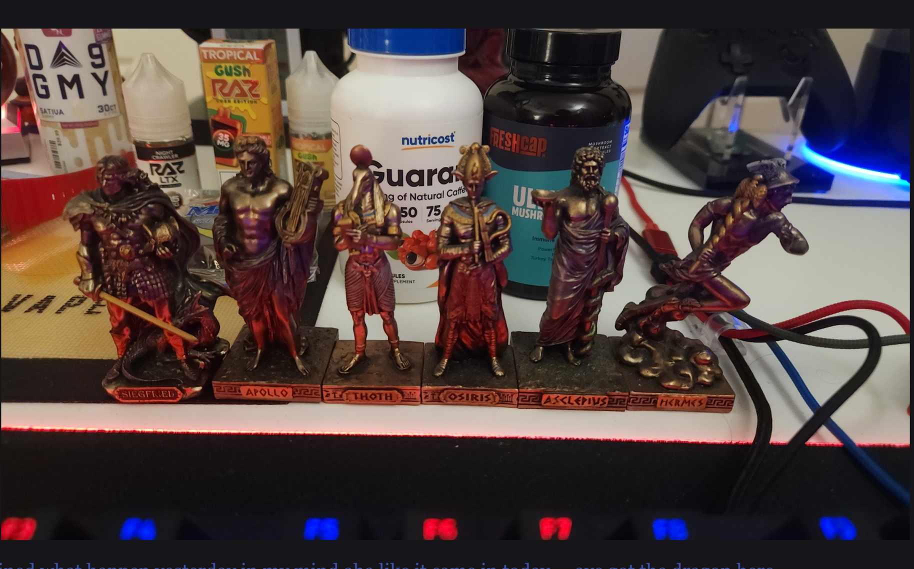
## Headaches

just a huge paradox to this all been like no jokes, w.e it all is here, like that we lost both our jobs up north when I got it back in 22 and in 24 here like cos of headaches from zyprexa basically, part of the problem here...

we again like it happens more than others, like really migraines, idk just mckenna mentions headaches in alchemy speech like that the mind changes, like its the worst , thc can help, but again its been fucked here in totality....

that its not such a problem again wouldnt take anything for it but it just happens often... like rn like we took some meds

## Siegfried the Dragon Slayer



lets go it came in today lol , I mean again I explained what happen yesterday in my mind aha like it came in today ... aye got the dragon here.
playing chess not checkers....
Victory Lap - Nipsey
thats where that line comes from

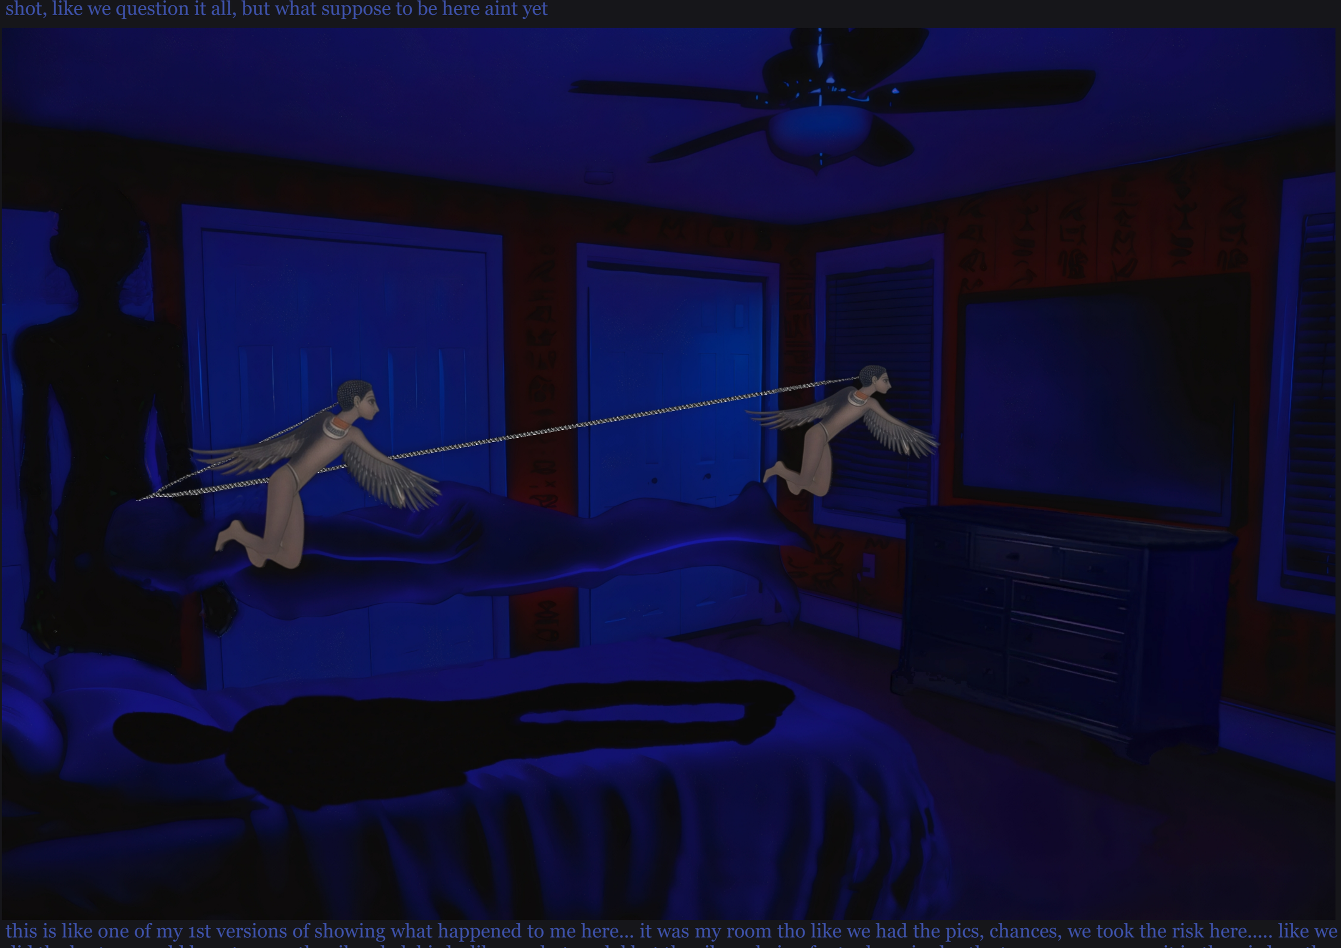
hahah idk its just cool like only we would want this like it can be the small things, dont need like again just enough to be comfy here and we aint, we worked hard like why is that.... again mad wrong w.e like but ye it sums up again the dragon in the clouds, on thy body, like its why we needed it here.... lol

Probably not gonna release this to my next day off... thursday... and saturdays be my day off, but yah like just idk nipsey too like we liked him before, and again expressed it before tho like when we got our electrical license, had our own van, like this is what we played in it at work, like victory lap, like we made it right and then all this happens, like I said the matrix pulled me in this direction always.....

## evidence of a divine prescence

too much perfect timinig for me to not double think, he even says that, evidence of a divine prescence... in that victory lap song lol like all of it tho, we just again like aint nothing been the same since all this here.... like we listened to nipsey coming up right through our apprenticeship to say and then we get licensed here and this album dropped........ one of the best albums in this way of like its in our memories...its how powerful music can be I guess

see even this like right it taking bits & pieces out of anything and applying it to your own method.... like how we named this chapter, over a lyric in a song, like you can do that, and make it , its own, but yah I mean is the entity not evidence of a divine prescence, so its just no lies like in totality, even he died got shot, like we question it all, but what suppose to be here aint yet

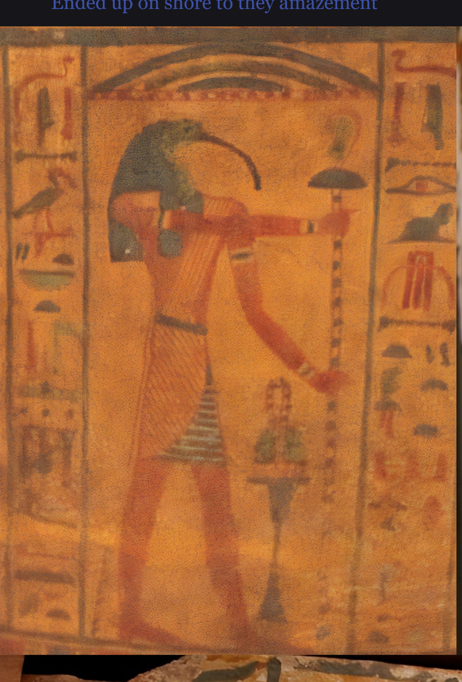


this is like one of my 1st versions of showing what happened to me here... it was my room tho like we had the pics, chances, we took the risk here..... like we did the best we could here to even the silver bab birds, like no1 but me lol but the silver chain of ectoplasm is also the true reason.... says it in the wisdom tho

## Dedication

another song from Nipsey

This ain't entertainment, it's for niggas on the slave ship
These songs just the spirituals I swam against them waves with
Ended up on shore to they amazement



## Double Up

just one of my fav songs on the album lol...

## Distance

The book of Thoth contained the secret parallel worlds & Secret ways of communication could be discovered w/ its help. The dead could be brought back to life & One could affect others from a distance

the thing is lol that durk song again that coworker steven, he always bought a reese before his shift, believe what you want right .... like I told thee story and we known this forever here.... tryna tie together all angles here... the things you dont see

## Thee Path of Least Resistance

just its how electricity flows and how consciousness goes...

## RWT

lol, just tryna mention everything from X here or our algorithms, like yeah we had this song in our Algorithms, RWT by Big Sean he says her name in it, chances, like your lucky I even like you cos of all things.... and it aint like it be one sided here but this is thee experience in totality, mention how we found big sean before tho like the kid in HS that drove me to hockey, we blazed and we listened to like HIGH right like .... just facts how this manifested he was 1 yr older than me

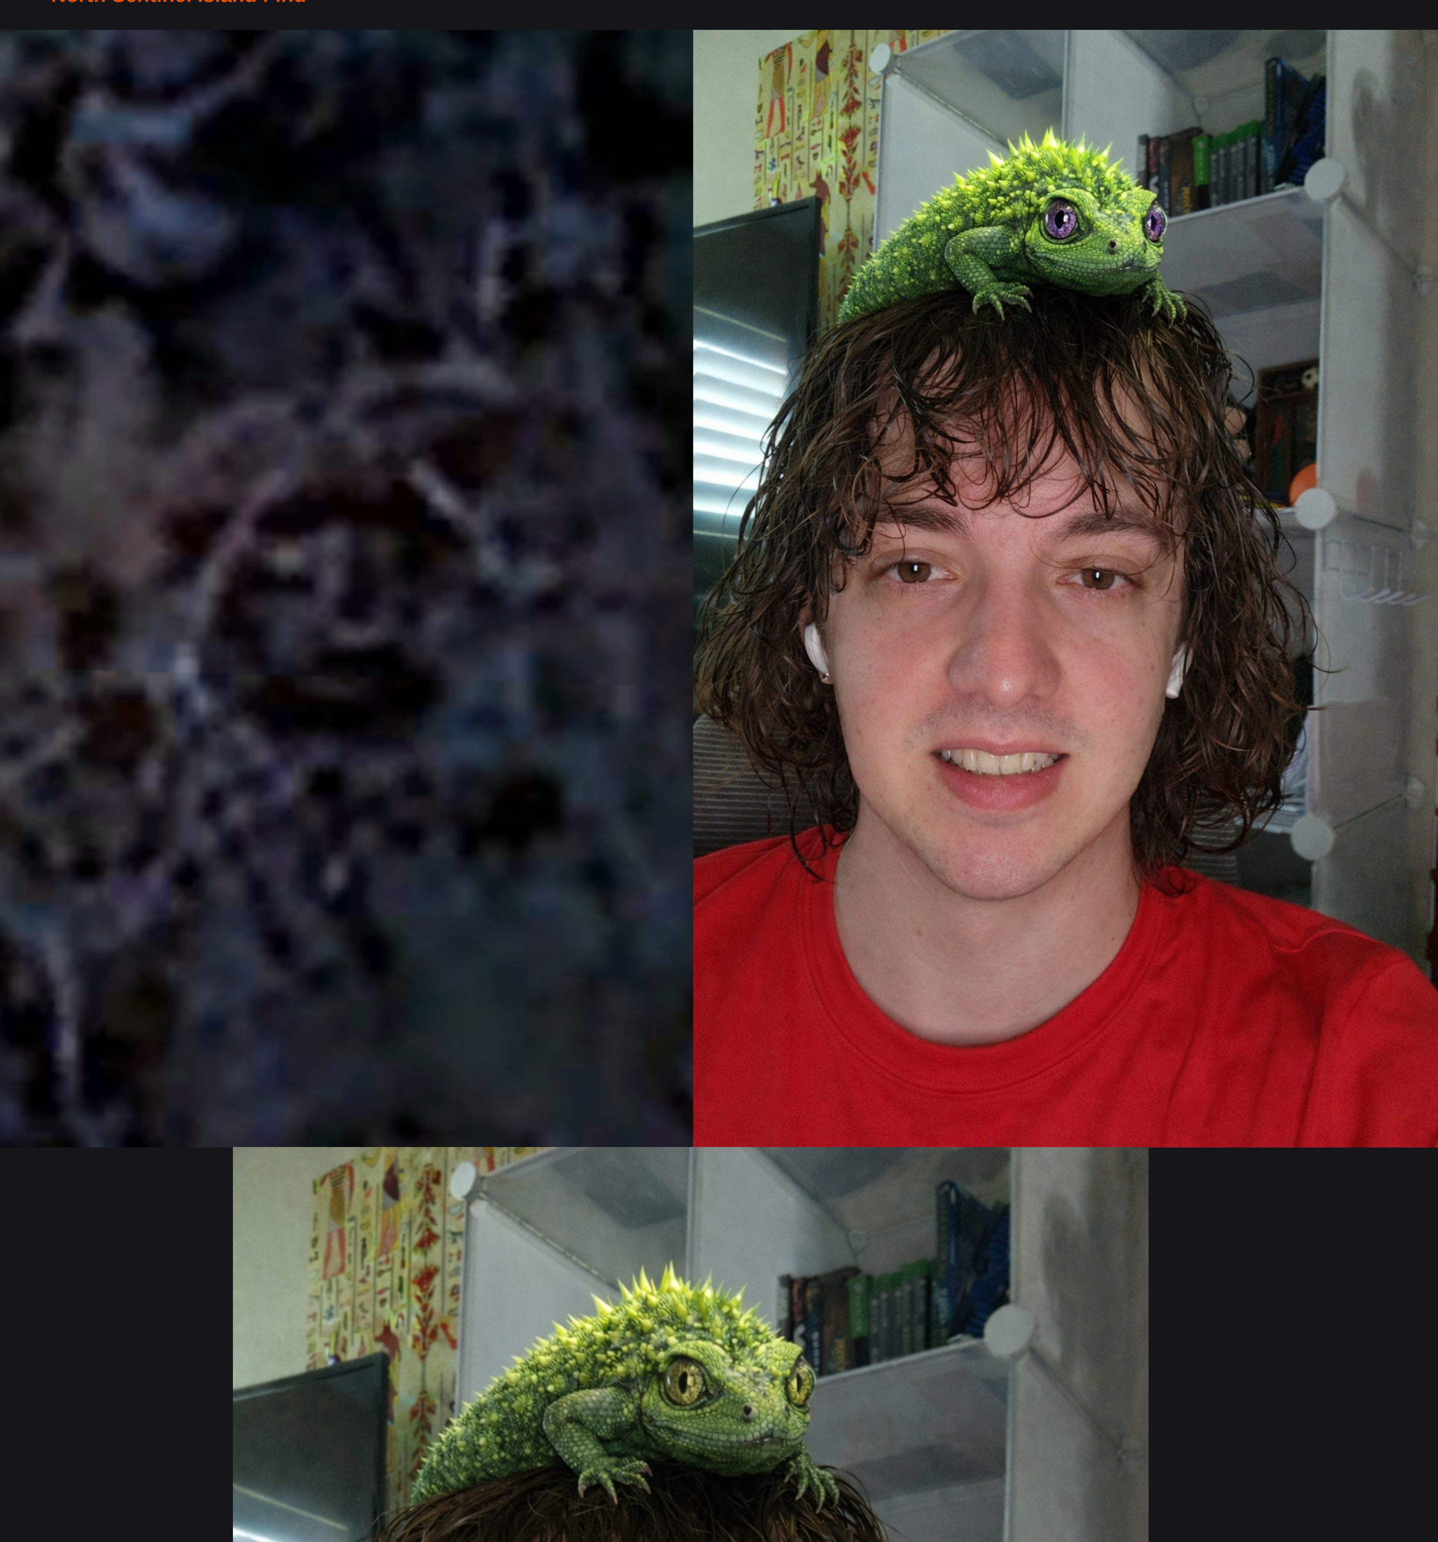
FIGURE 11.4. This gilded judgment scene, associated with BD 125, shows the heart of the deceased weighed against Maat, the symbol of righteousness. Several deities assist in the activities as Anubis and Horus attend to the scales and Thoth records the outcome. ROM 910.85.236.10 (with permission of the Royal Ontario Museum © ROM)

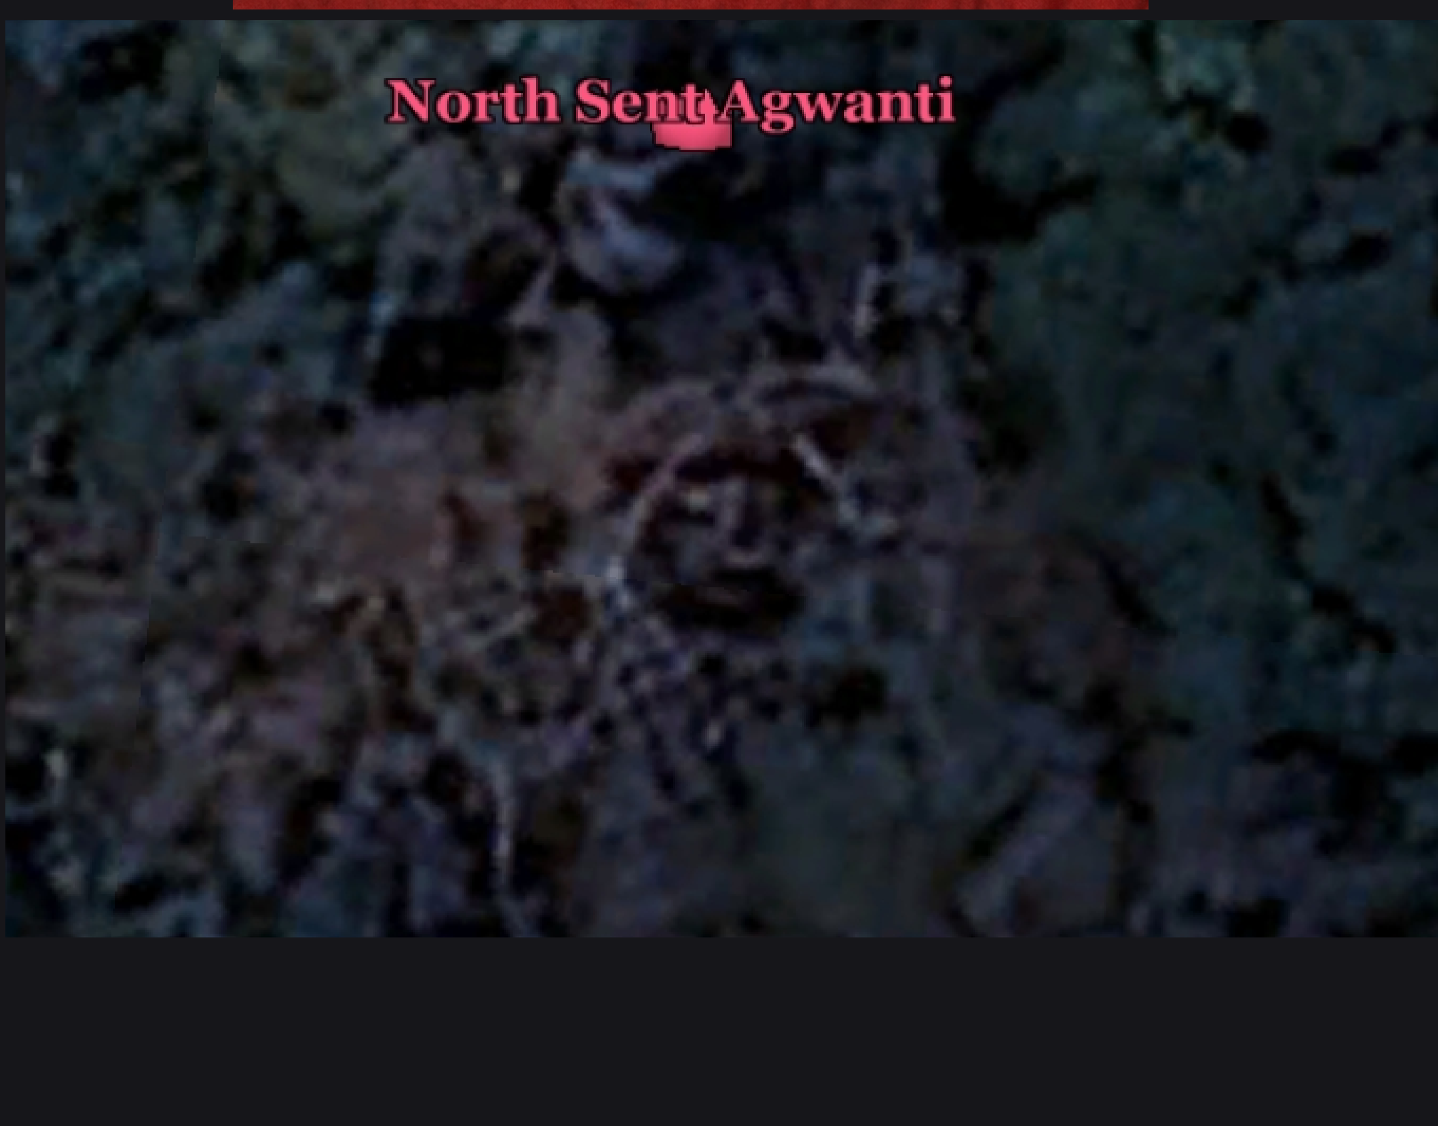
FIGURE 4.2. The *ba* of Nebqed returns to the tomb at night and is shown here flying down the shaft to the burial chamber to reunite with Nebqed's mummy. An empty chair in an illustration of Nebqed's tomb indicates that he had departed for the day in the form of his *ba*. Louvre N 3068 (Heritage Image Partnership Ltd / Alamy Stock Photo)

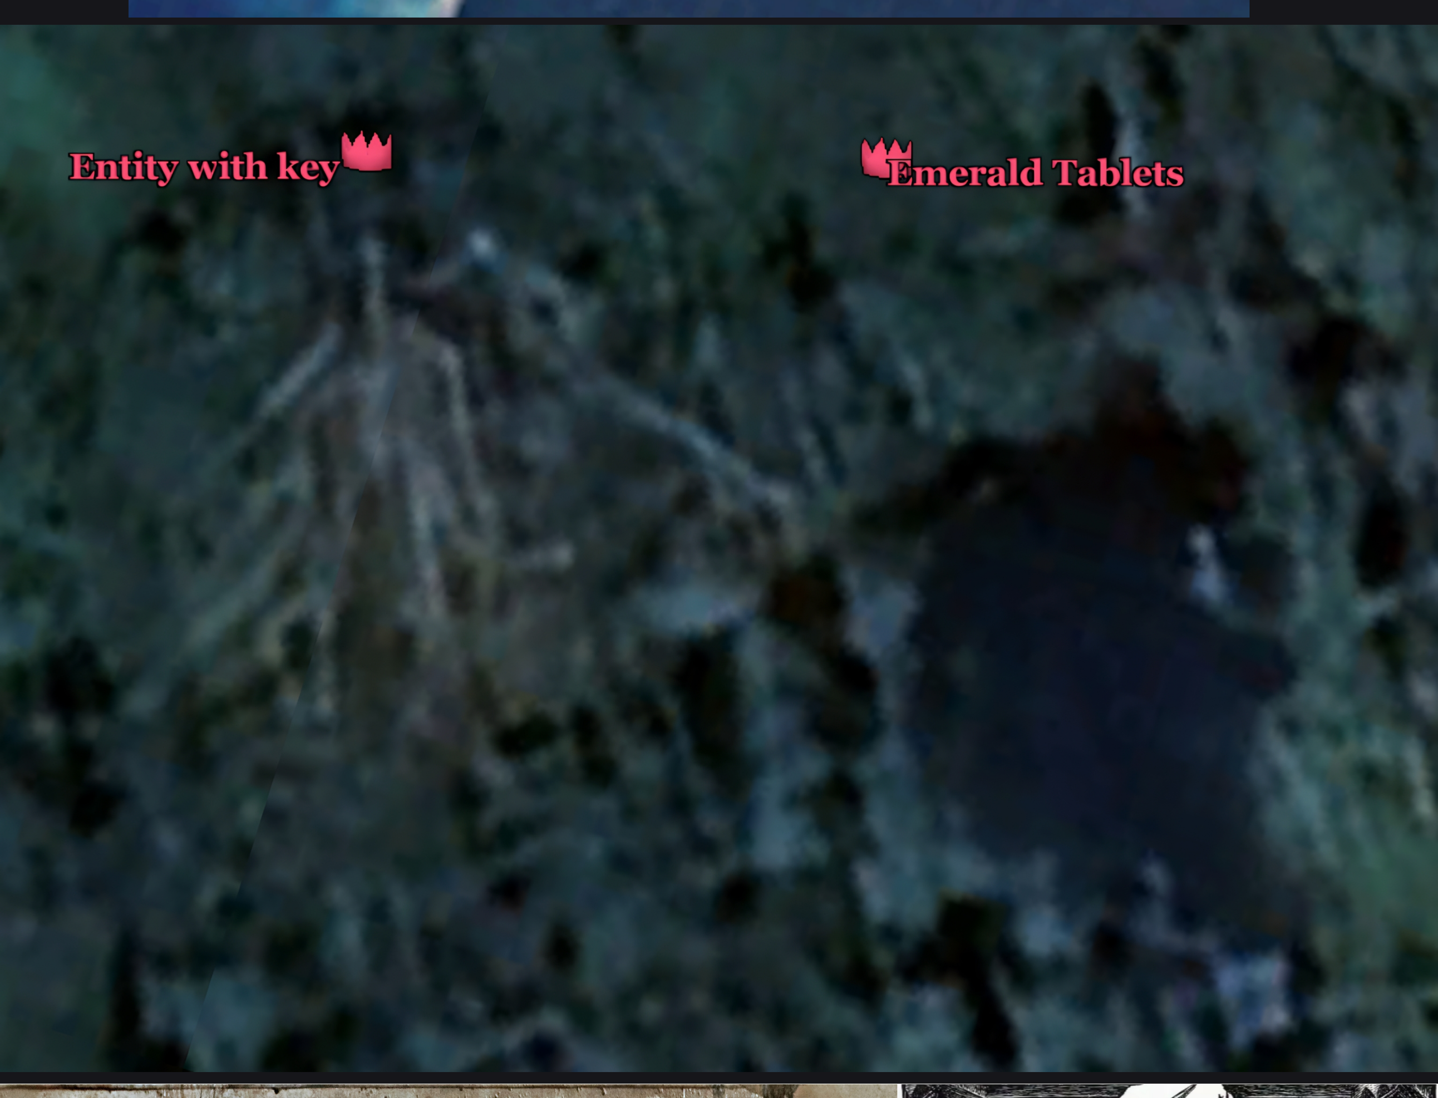
## Glyphs

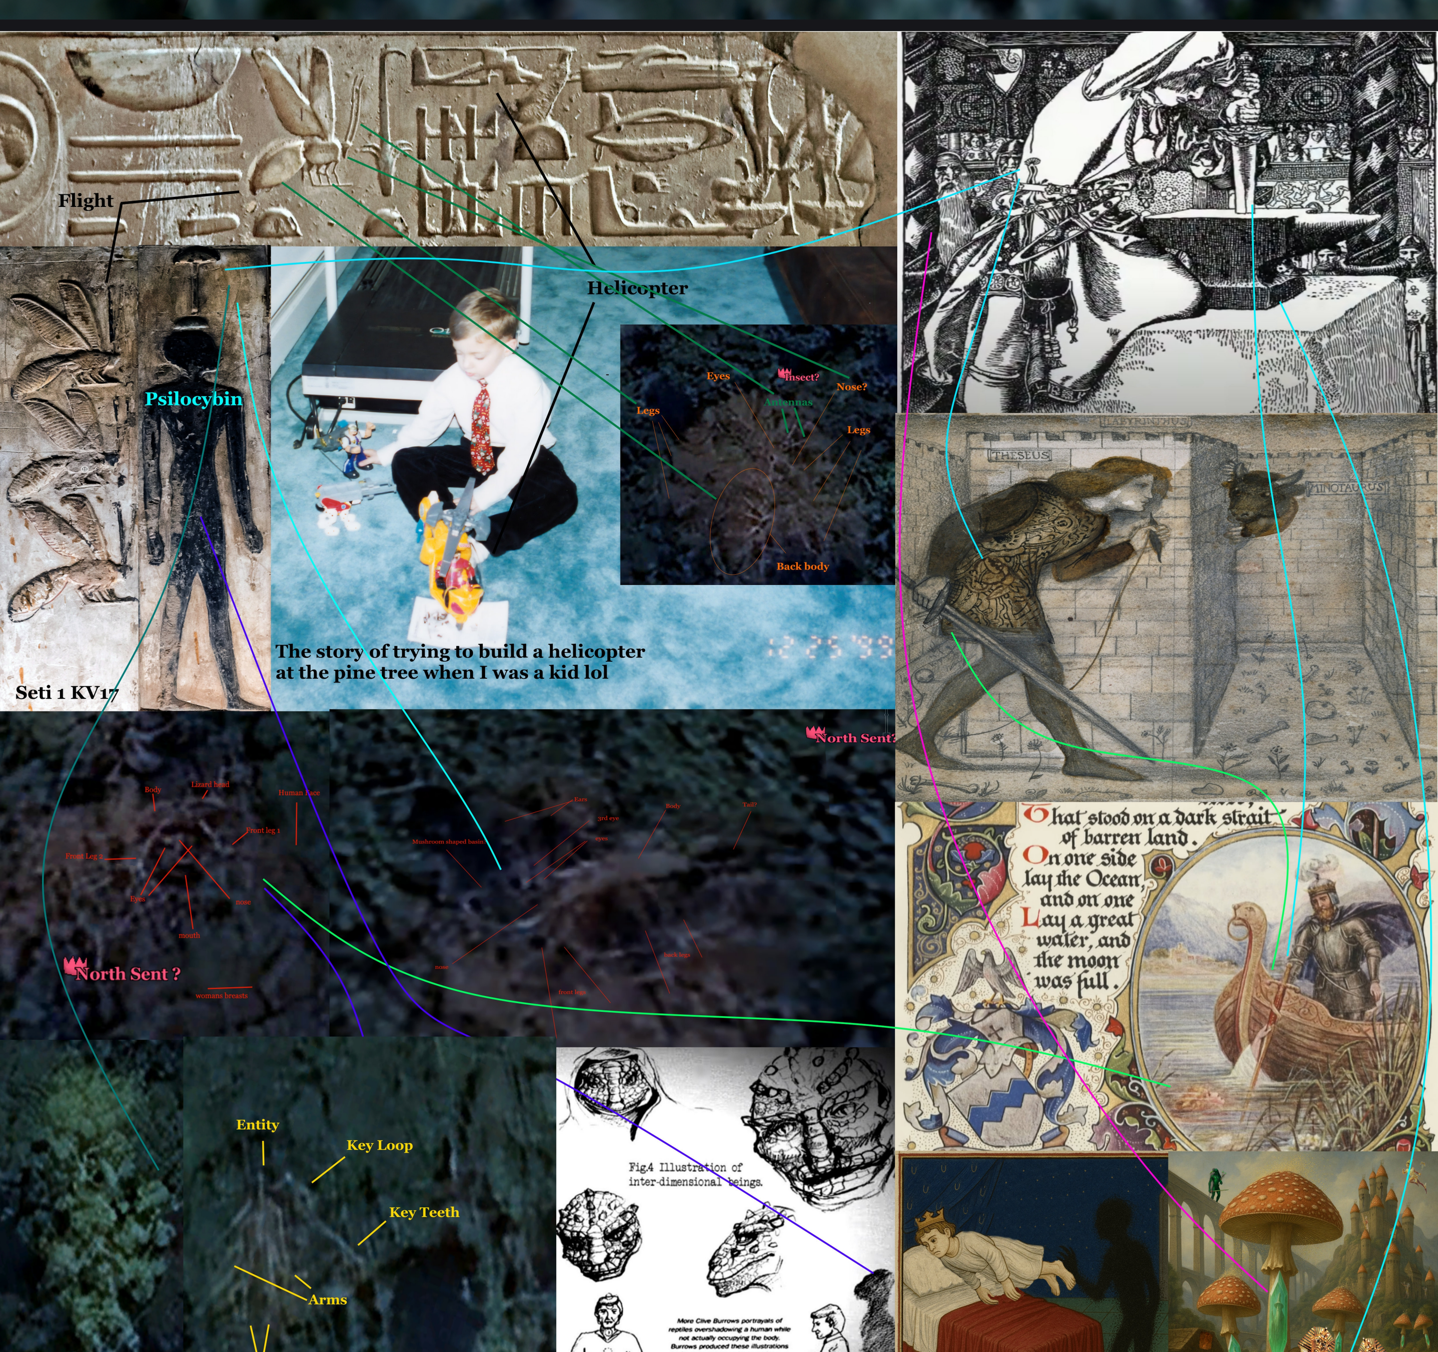
## meIRL

## North Sentinel Island Find









we got to get ready for work we running 10 min late tryna fix this up lol we got alot more here

just writing as we go but we made up that time but got like ya 40 mins before I gotta leave here...been taking 1 guarana 100mg caffeine and a red bull the small one before and at break

but thee thoughts be raging in the shower lol like imma tryna write my story for w.e reason & its like this gotta go to work like dont know bout thee future here

but so we explained this 5 times atleast. how we found this was again leads back to me watching a RS3 streamer forget her streamer name oh yah the knight or something right her rs name was like tooth gap but we watched this 1 day before harry and like the next day bam reddit appears on my top apps im like wtf and mad ppl on rs use it, but then we went into harrys stream thats a diff story here but its how this happen

cos we saw north sent on reddit like 1st thing we saw as if early on, and just was interesting right... like only uncontacted tribe, peaked thy curosity eventually, like cos its watching yt'ers who use google earth right or theirs a sub on reddit we dont always follow that like we change our algorithms up... but cos that how it works

but so last yr 2025 again all this upscayling seeing the dragon, like this island... super interesting like just it showed us the design of the whole game by chance like that it is natures pattern but somethings are man made, like this is the thing here

its about the entity and nothing else, what them trees show above is an entity with a key... just it makes zero sense cos we saw the entity if ya hear me out..... book of dead they offer coconuts like well what did the only ppl who did visit offer and its all that like dont know, like I think im right here.... if you look into their history it is deriven out of africa like they are black right... I just think its too interesting, like that the design of the universe repeats it self on every level like but no1 wants to show you or share how to see it, but I did.............

like so its spending time right on google earth in my last books, looking around like legit we were looking like again just idk it breaks paradoxes to me... lol like cos we aint spend time everywhere but it is also.... like but the fact we went here cos of reddit, like the pathway life has taken me.... =( lol like cos its just it is super interesting, like an uncontacted tribe are aliens on a level here, like but we know how the mind bes, like we be wise, the bonus genius and nothing

we even again tried to share on YT, tried to share on north sent reddit that was a mistake they hated me for sharing this vision lol bunch of haters for no reason tho

## 3 books in 2 weeks

we may add more to North sent after work, but im thinking of ending this book here actually cause it doesnt gotta be forever but to end on a curious note I guess, like it is real in a way either way right like it has to do with entity again, that part , like who has this experience & sees this also....... w.e like I aint trust shit cause the answer is a paradox, just gotta be a friend & share lol............ like we could at this rate, generate another tablet, like if we keep writing, & the paradox is knowing the truth about the tablets, how we read it, is right, the characters on the book is the coding of the Universe................. which the answer was always their its seeing it I guess cos its Universal code either way .......

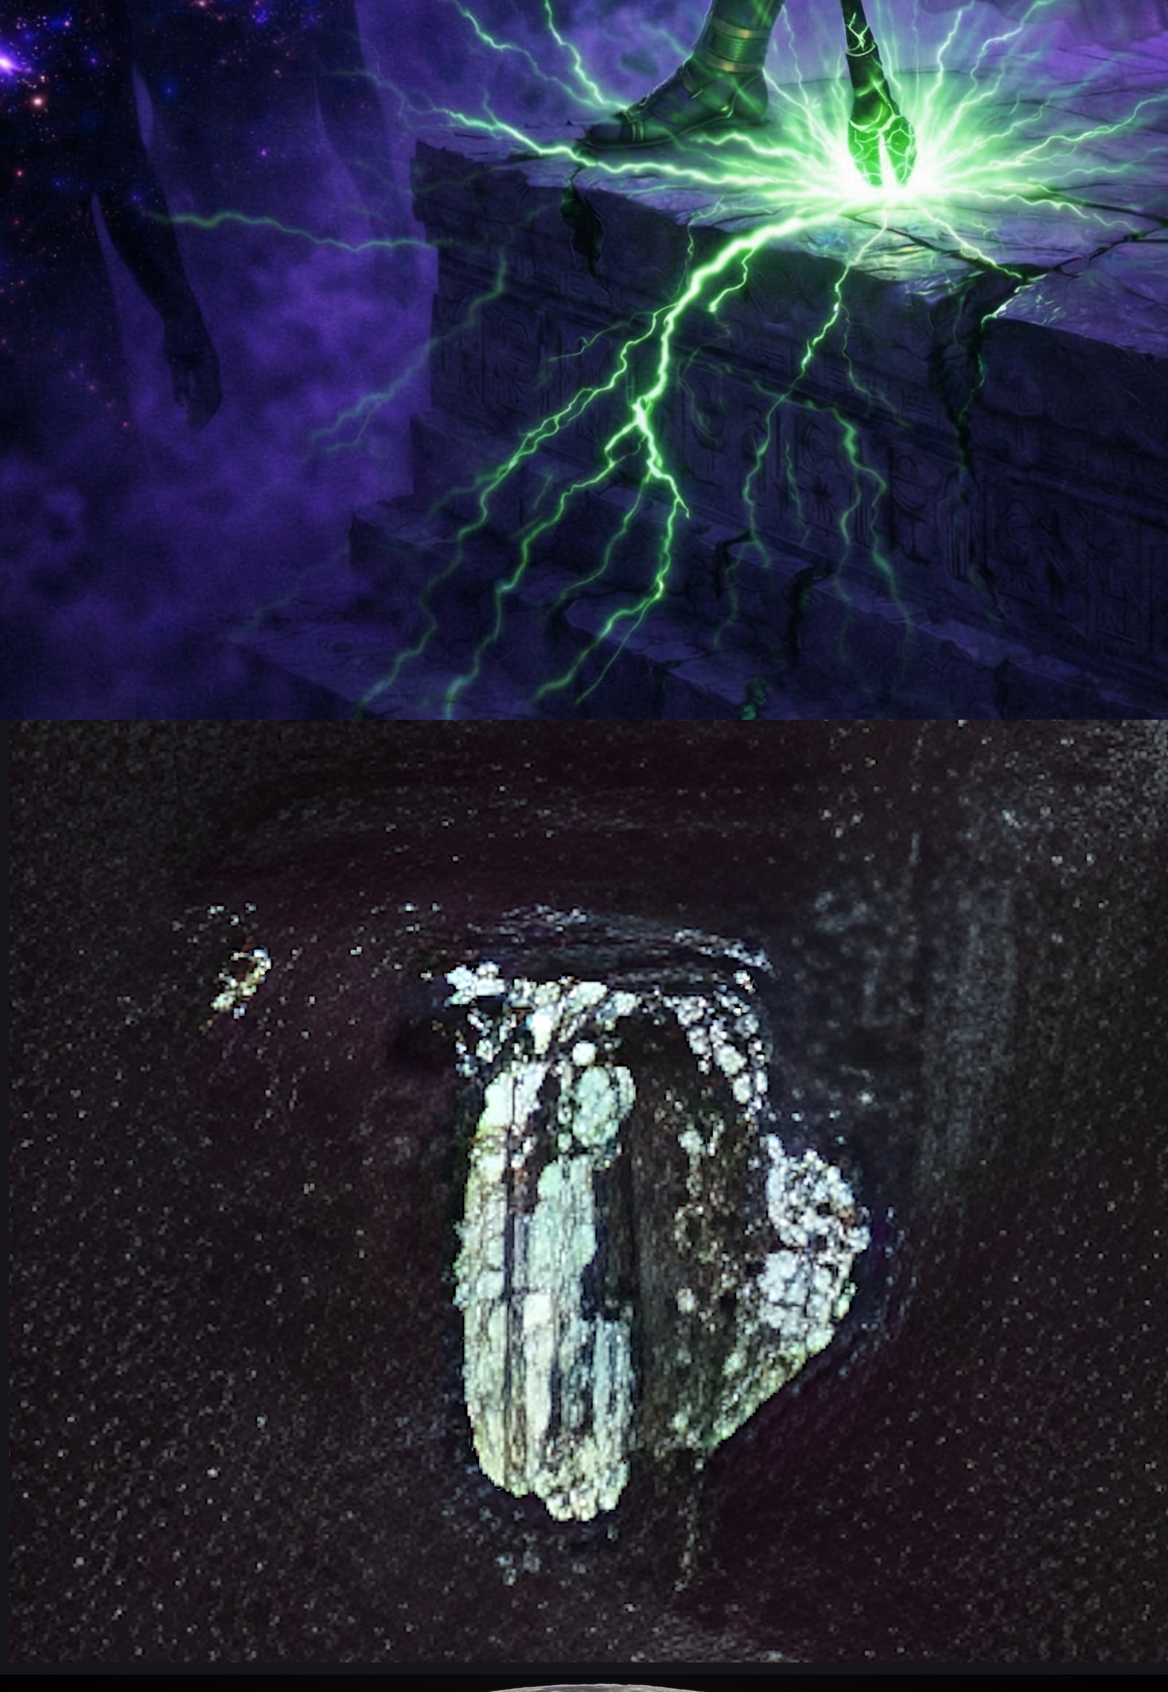
i guess again its just that paradox I use this word alot... but that like yeah it takes 1 person for like things to change lol.... like really here I dont know what to think and that aint no fun.... like just we already like pft if nothing be free what can I do, but someone else could make a difference like but again being single is like letting the algorithms fall into place even more like by force of something needs to be eventually lol... =(

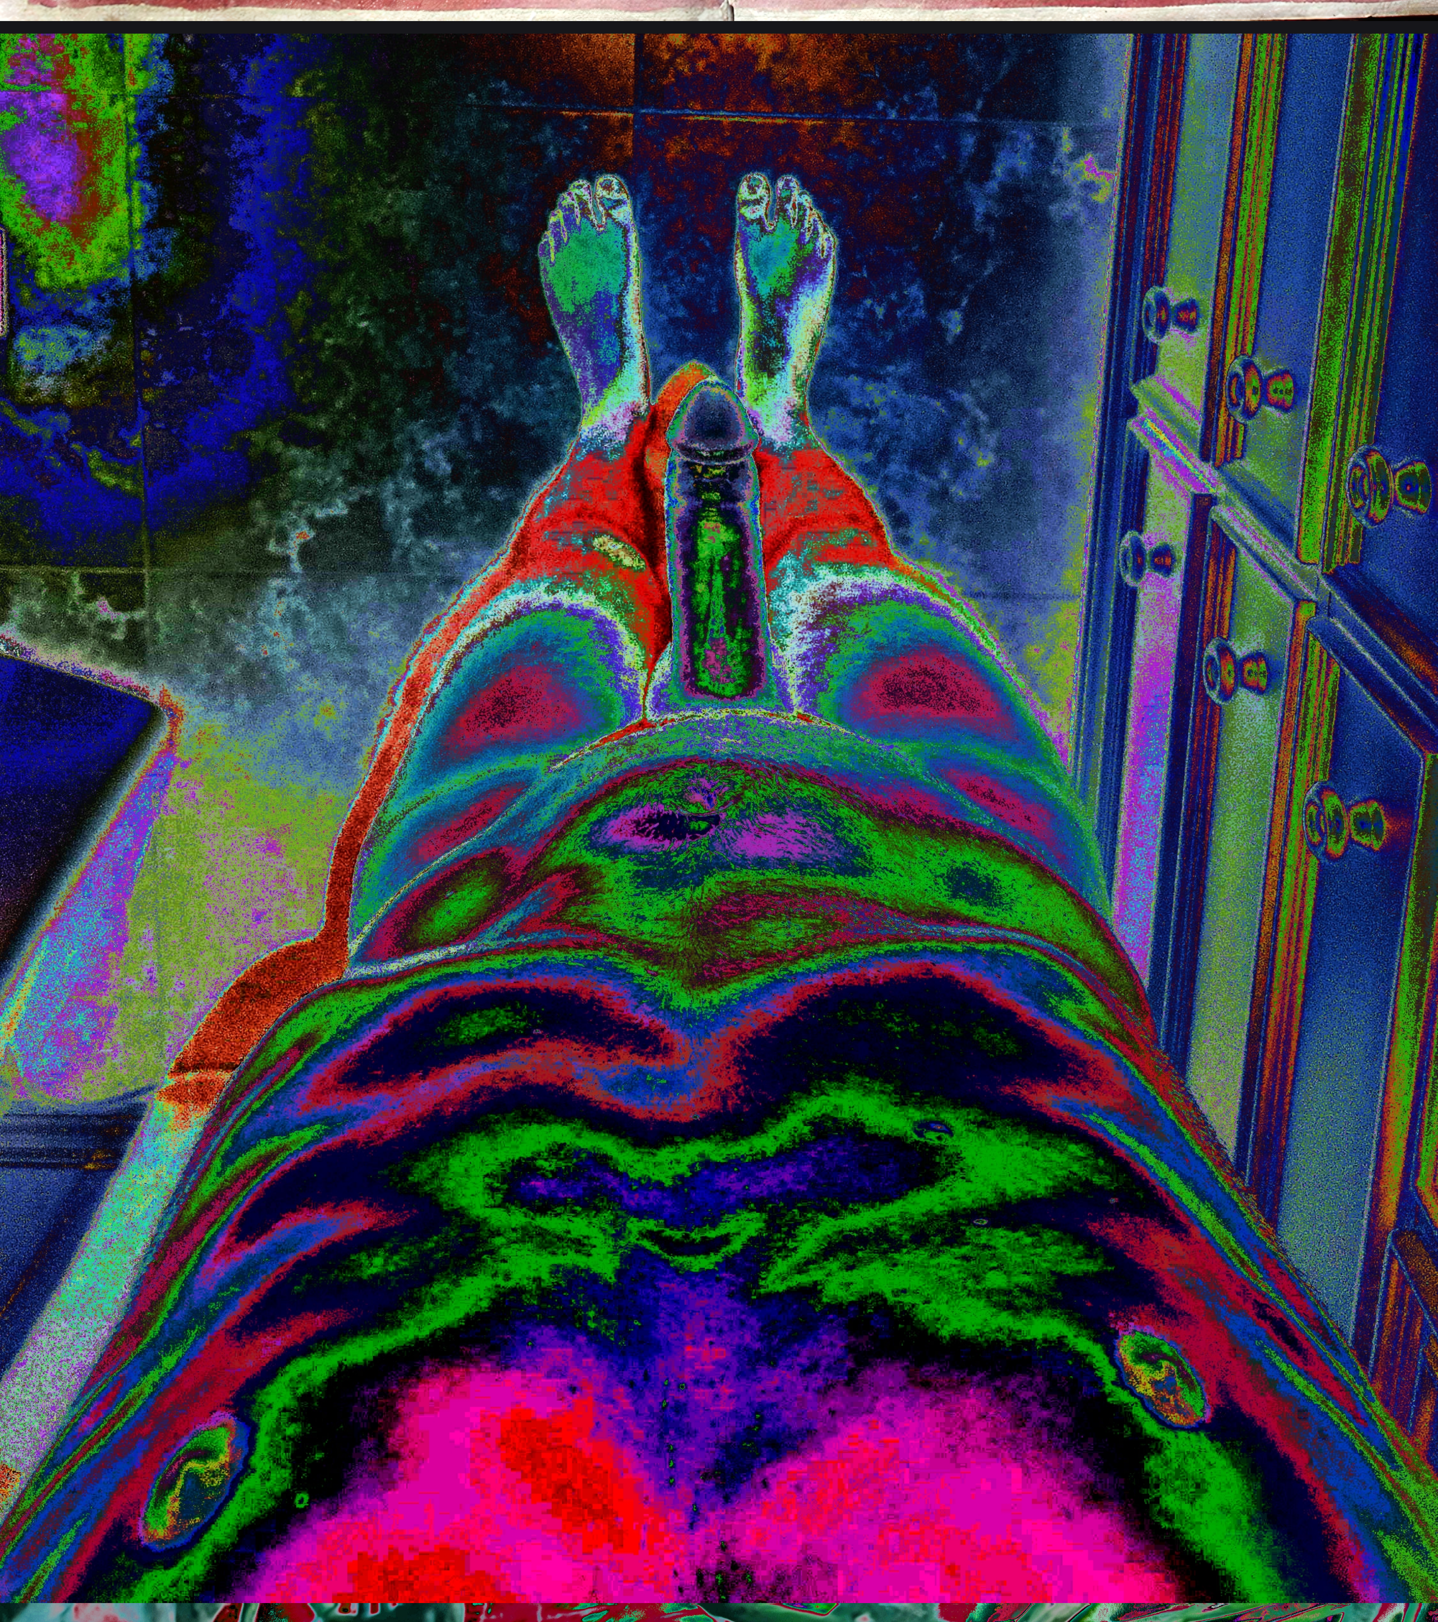
we wrote our 1st book, but 3 books in 2 weeks be like Osiris like he got 3 prime books based on eachother and all that, like he says or it says if ye read thy 1st book..... lol but yeah idk like I feel like this is never gonna stop here, like Im being used when I let it out like you just wanna take more from thee when I be open with it... starting and been taking advantage while I suffer immensly like we can write like this in a comfy spot here too like just the writer is all their is to reality...................=(

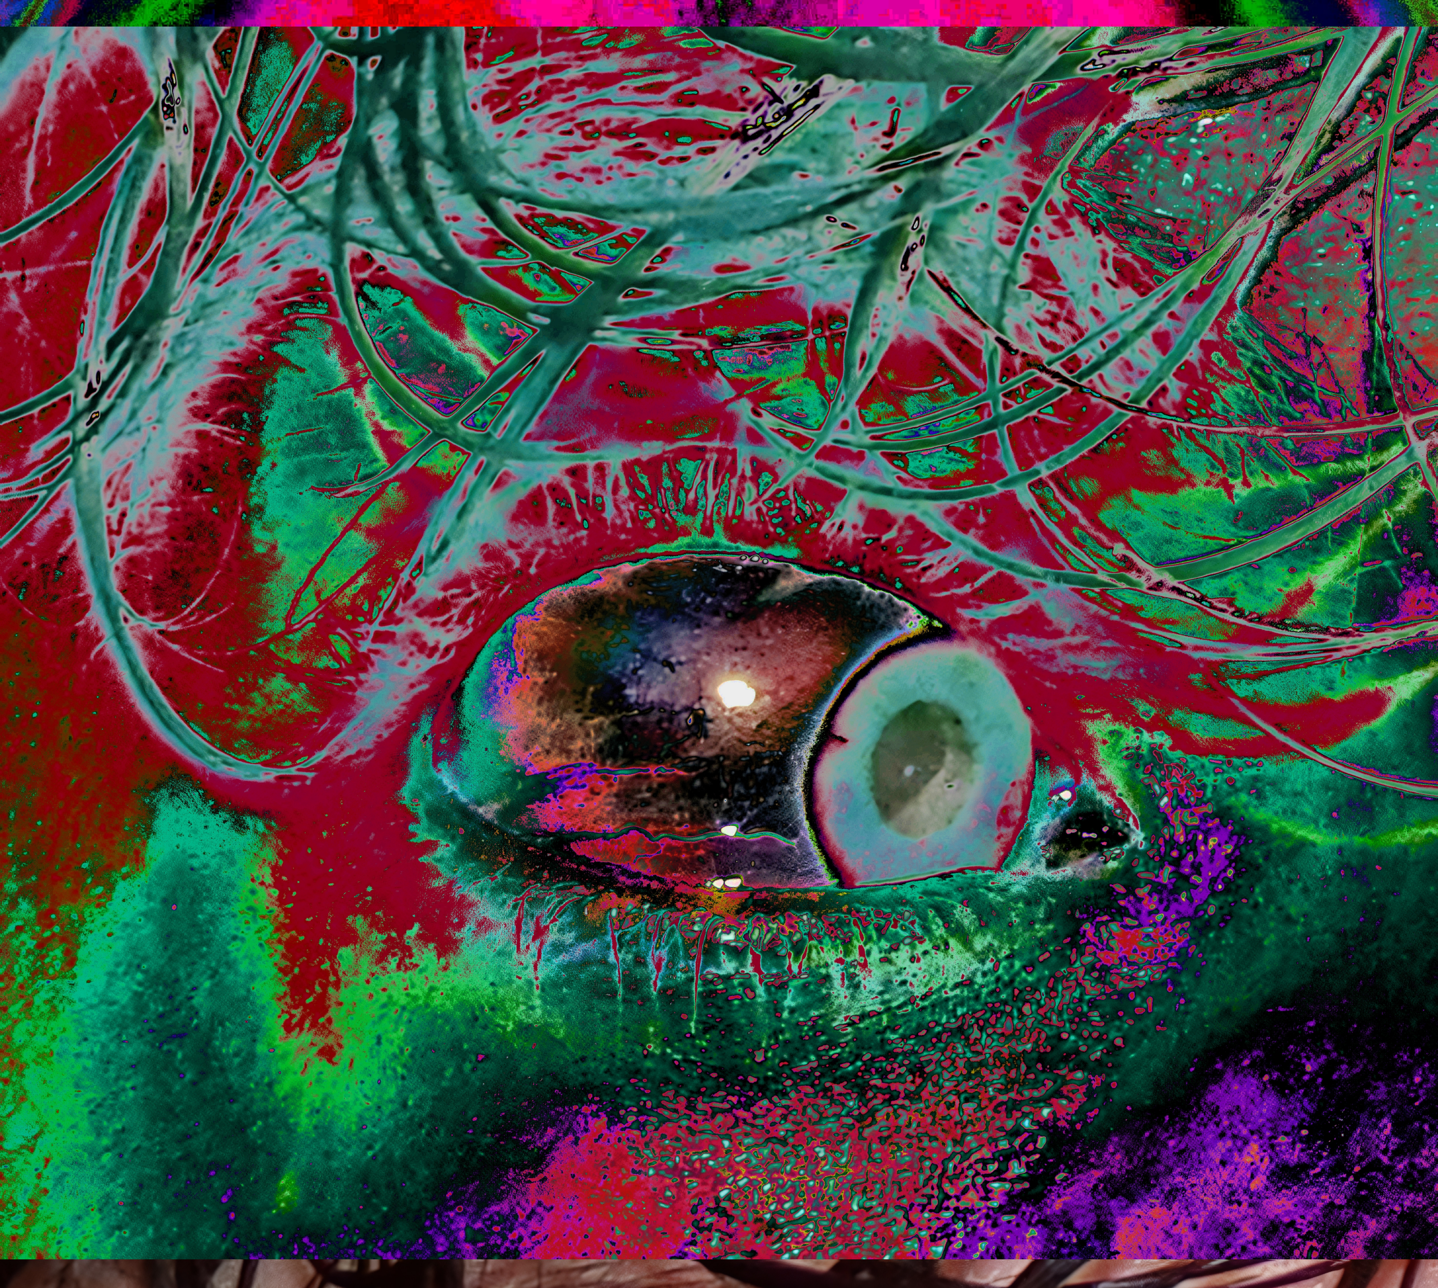
moving like this when reality aint, like it can be dangerous like but the fact is we bring the truth share the goods with thee... like what would you do right like is the real question...... like having my thoughts open here or in cyberspace.... like you do never know here.... until you do know.... lol, but yeah like well its why we take this route and its again not like im tryna push anything to anyone just put my thoughts on the archive ahaha ... =(

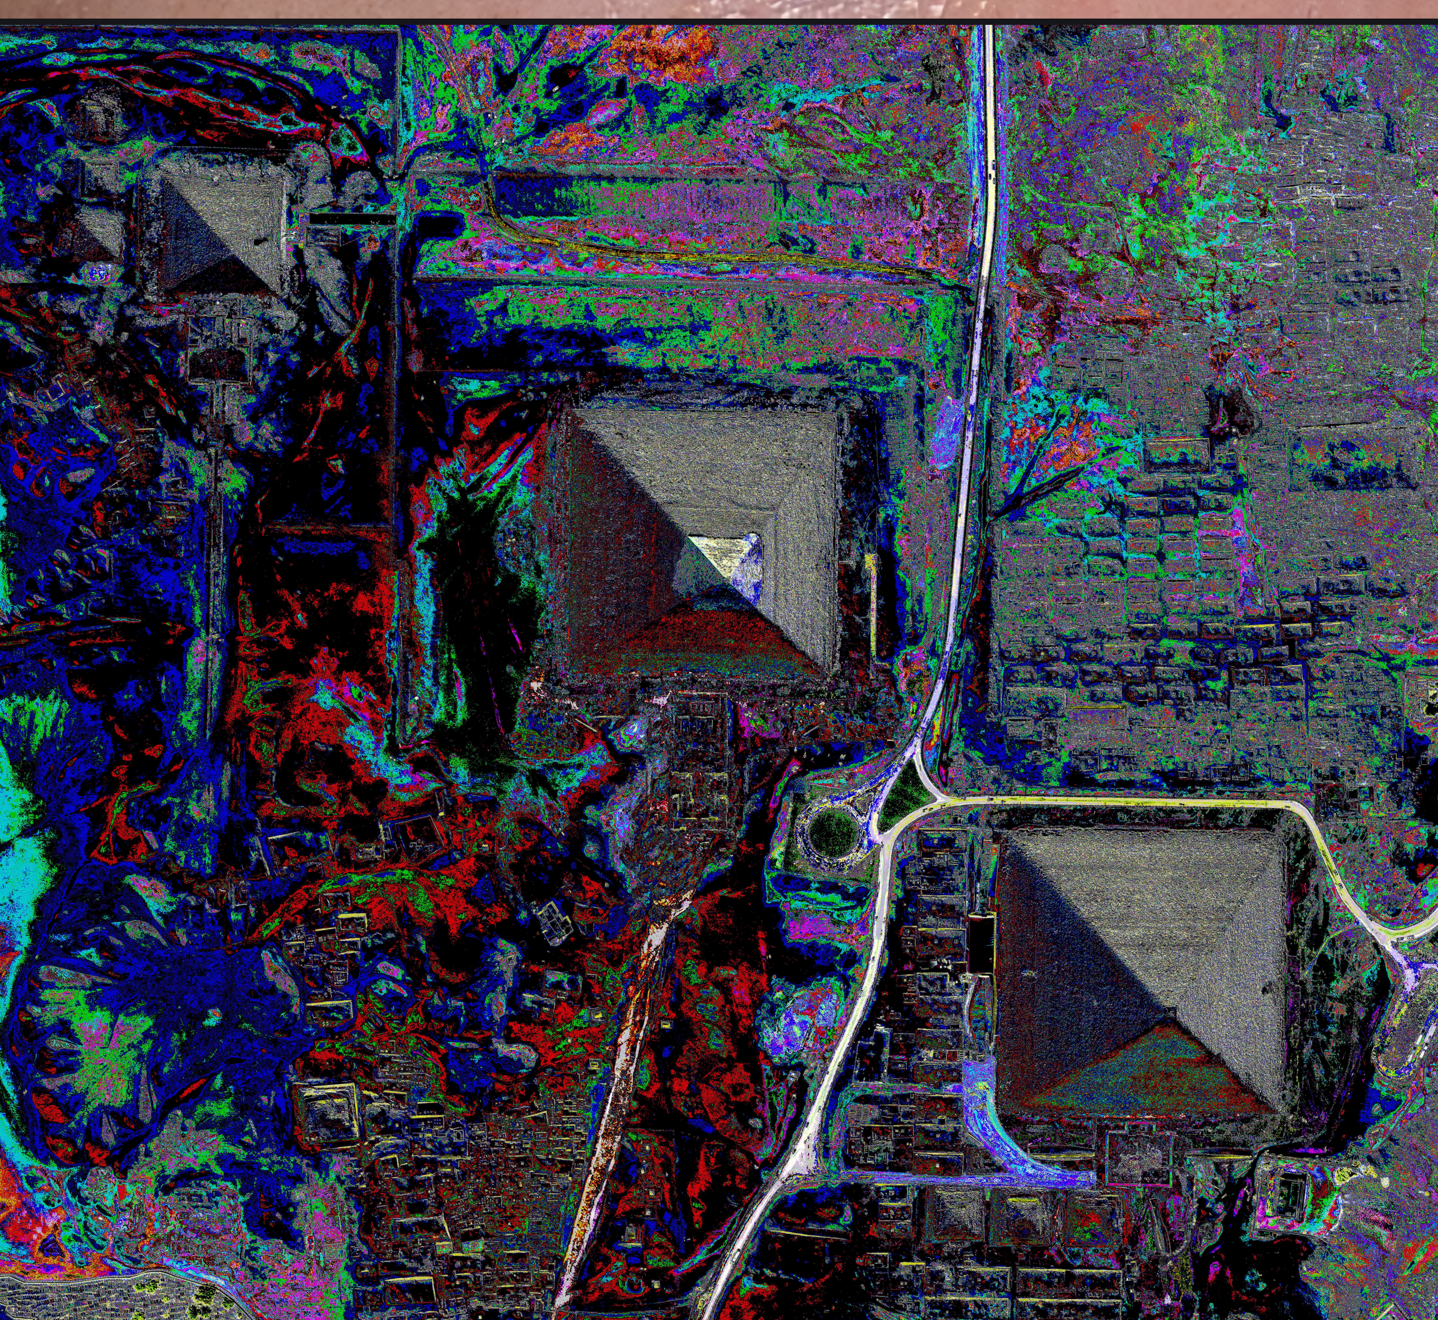
I just I dont even know like this be the same paradox tho iv been stuck in since last yr, why, cos the tablets opened thee mind to the truth..... like what am I suppose to do like aint new algorithms hit thy page like nothing else works for thee lol... like im just tryna prove a pt in a way of like w.e this is, it can always be or not be like what you think reality be & what reality is, differs from entity to entity, like just all of it, life be just chaotic af rn cos of all things like what we gonna do if dont right, our writings tell the story and truth to how nobody gives a fk about me, wanna see me down, like its simple, medicine suppose to help people here..... the right things should be legal, you want ppl to not be stressed like the whole thing screams corruption like just lol just want to do something I love doing in life here........... and not much works......... like so any means necessary like well its that life/death situation, is how we read it... again too wise, like pft you cant shame thee here, we just are the truth lol....

the prob with me also like idk cant explain a story without adding the important parts, like as if we are all humans anyways aha like that just who we be, like just life been too precise here I guess for me to think otherwise.................. so its why something else needs to be..... but yeah idk like im sure others stories are insane like but they dont write about it or go the way that we do here with it.... its all we do know tho thy parameters to this is whats suppose to set a specific reality into being.............. lol like just idk its obvious to actually sit here & think & write about thee truth........ just thoth wouldnt be thoth if he didnt question his thoughts.......................... thee most wise lol for a reason............. who says again, the truth never goes anywhere its the thing which doesnt corrupt is thee paradox of the tablets, lol ...................









## Morpheus

like idk just like it this rn, ahahah like in a way here, I dont like to talk about work cos it can be personal but this is what it is rn

just like so this is my side of the story....

again imma express it all cos IDGAF , so the 1st day at Publix like I worked with my assisstant grocery manager right his name is Chris, like that the 1st day I noticed he had newports.... like he smoked, like that hes black, I just say it to paint de picture here right like always got along good with him...

well back then I was on them zyprexas all this happened to me, like he was always a friend, like he was from Brooklyn NY right like idk just we again like the gza album his last name is Killa, well we played that song on our cloud video.... I took it off for that reason here cos it was too like I didnt know it was his last name like I did but I didnt at first so it just happen.....

like hes the one hes older than me like 10-15 yrs older, like my dads age as if , like but hes the one that reminded me of Morpheus from the Matrix, like so back then like idk like I said liked the other girl we worked with in a way right like just truth we aint talk nearly as much like nobody knows, like we couldnt she was cute like idk anyones side of the story ahaha like but yeah.....

so we always threw into the algorithms morpheus right red or blue pill...... and again I showed off my blue gshock cos my transparent one is like old corrupted yellowed, so we got again new straps on the gshock, red and blue mix I showed in my other book.... and yah like cos the rumor be that hes leaving but dont know I dont trust anything but right when I wear this watch you see, like he knows I know & vice versa

cosss well candy comes in on a different truck, refridgerated with produce I guess and before, we always threw candy like cos we worked a diff shift...... and today I noticed the reese maybe was on sale before but their was again a huge amount ahhaha like 80s the shelf fits like 20 ahahah and yeah like bcos of the chinx relationship

its where it all ties together you see, chinx was from NY..... and candy rain ft cRody ,...... like honest I dont trust shit you see... like cos its as if I know they been firing at me but idk like .......... like cos all of it.... one of the most inspirational rappers to me and my ex last name.... archinski ...... my 1st gf last name ... abramofsky like see what I mean here tho........

and yeah like idk if he leaves lifes gonna suck more ahahah like I heard it tho and who from like would never trust it, but it sounds legit like ........ cos you know he seen my car and all this..... drove a nicer car than he did.......... like and the 1st time I saw matrix was when this happened to me in 2018 and then the matrix released another movie after I mentioned it right like the keymaker in AC Odyssey the keymaker is hermes....

a few weeks ago when the new girl came also like right see stack bundles... see what I did.... like cos its sending mixed messages but its we went into stack bundles cos I didnt wanna hear chinx at 1st but we listened to it all & that.... in that time, I wrote a note to this woman, like so the pallet drops and when we restack it im like, looks like a pyramid.....

but this is what he said to me when I started the job.... he said, some ppl stack it like pyramids and shit like the stuff in the baskets ahahha hes like but yeah then when I listen to the two birds one stone album cos the other girl I liked like idk my mind been fucked like see he knew of the algorithms and went into a pallet and was like imma kill 2 birds with one stone here and pulled it from the middle like jenga ahahah ............ just like yeah idk but to me, like he even said this one day

a produce dude was throwing out mushrooms & he said, yeah but their not the kind of mushrooms you like to the other kid when I was right their and my paradox of this all.....................

theirs lots of times we used this stream, again like that other kid zack who worked their like just he was black younger than me ahahah or others just all ways we killed em with the algorithms like I put in mooktbg then and like again all that I liked mooks post when he dropped confessions and then he came out with imaginary..... but the truth here is, like again consciousness be weird but my exs friend dated a black dude like everything is fucked ahahah like cos idk I went into it cos me & joey played speaker knockerz like when I got with my ex we like double dated it was just what I remember plus 100 other songs tho but yeah idk ......... like got no friends here......

its like to me here he knows something about my situation you see vice versa, like we know something....... bcos I went the dr the same time I also put it in the matrix is the realest shit but thats how the 1st one begins, neo is at his computer and its like follow the butterfly I swear aha nah the rabbit and his computer says...... wake up...... like again wtf cant wake up without adhd meds. we done woke up like aint shit been ...................... Iv said it all what happen at my work here..... and again

why did tory lanez come out with a song of my managers name...... Kody, like fact is he dropped it after I wrote her a note which I shared privately on X cos thee situation and cos of this, like we put him on not recommended, we never listened to his new album

another the other moving assisstant mananger like we mentioned like rap music and this and that he was a lil younger and I said yah like I forget how it happen like but I said i liked lil baby over da baby.... lol and that yeah I dont listen to kodak black.... like my ex played that song no flockin I just remember but anything other than it , like we never vibed to that.... lol cos you would think I do but my energy be precise

cos I told you of all if you read my books you would know thee mind really like we lost X which is why were tryna to show you here..... we were private, idk whats going on, but we need to be trusted here more.....

like even today that girl she had a purple cup like she got a coke, like its just I cant help it . I feel like ppl do it on purpose, we know too much............ but cant tell what it is, like that maybe its tryna be it, but maybe she respects its something else for me, like we dont know whats going on here tbh.............

cos like another thing with the algorithms was this recently like right heard some like dumb shit happen right like thats why we played I whip yo head boy too fuck with both of them ahahaha like cos my coworker back in the day doing hvac controls thats what they said, ill whip yo head boy with the back of a boomerang, I think its a movie scene ahahahha but yeah like just we have killed it tho here with our alchemy barriers, true or not its true for thee people be like wtf about my life and even I dont know, Like I showed and told it all here.......... cos like just I aint pick sides on that right, just if it was me, I woulda said something then and not waited like wtf, but its something as stupid as this to why I lost my job, like cos we know both sides like when things be against thee or when your pissed off ahahaha like yeah idk like the fact is anyone could read this.... my archive is on my YT videos about ancient egypt I swear like so it aint hard to figure this out here.....

but we also play like again we delete shit quite often also here...... bcos of that reason, we played a song for every persons name at my job like idk life is what you make it tho...... like kyle, or scotty like them names be ppl I work with, we even worked with that nathan dude like again nf, I just dont respect this at all, cos if your gonna show something, show it right, dont try to steal thee story here, like thats what they wanna think , cos I shared fredo santana like sleeping in a mansion right, well I listened to nf cos my 1st gf had it posted and I loved her like I said, but its all this my experience be too precise, like that to me, its like they against thee, they think ill forgive them like no way not for this, you know how easy it is to pass the bong here or someshit for real tho like all of it, cos anything can be........... like we too wise for them........ and all of it, like just we spent too much time following our heart and dreams for nothing to be here...................

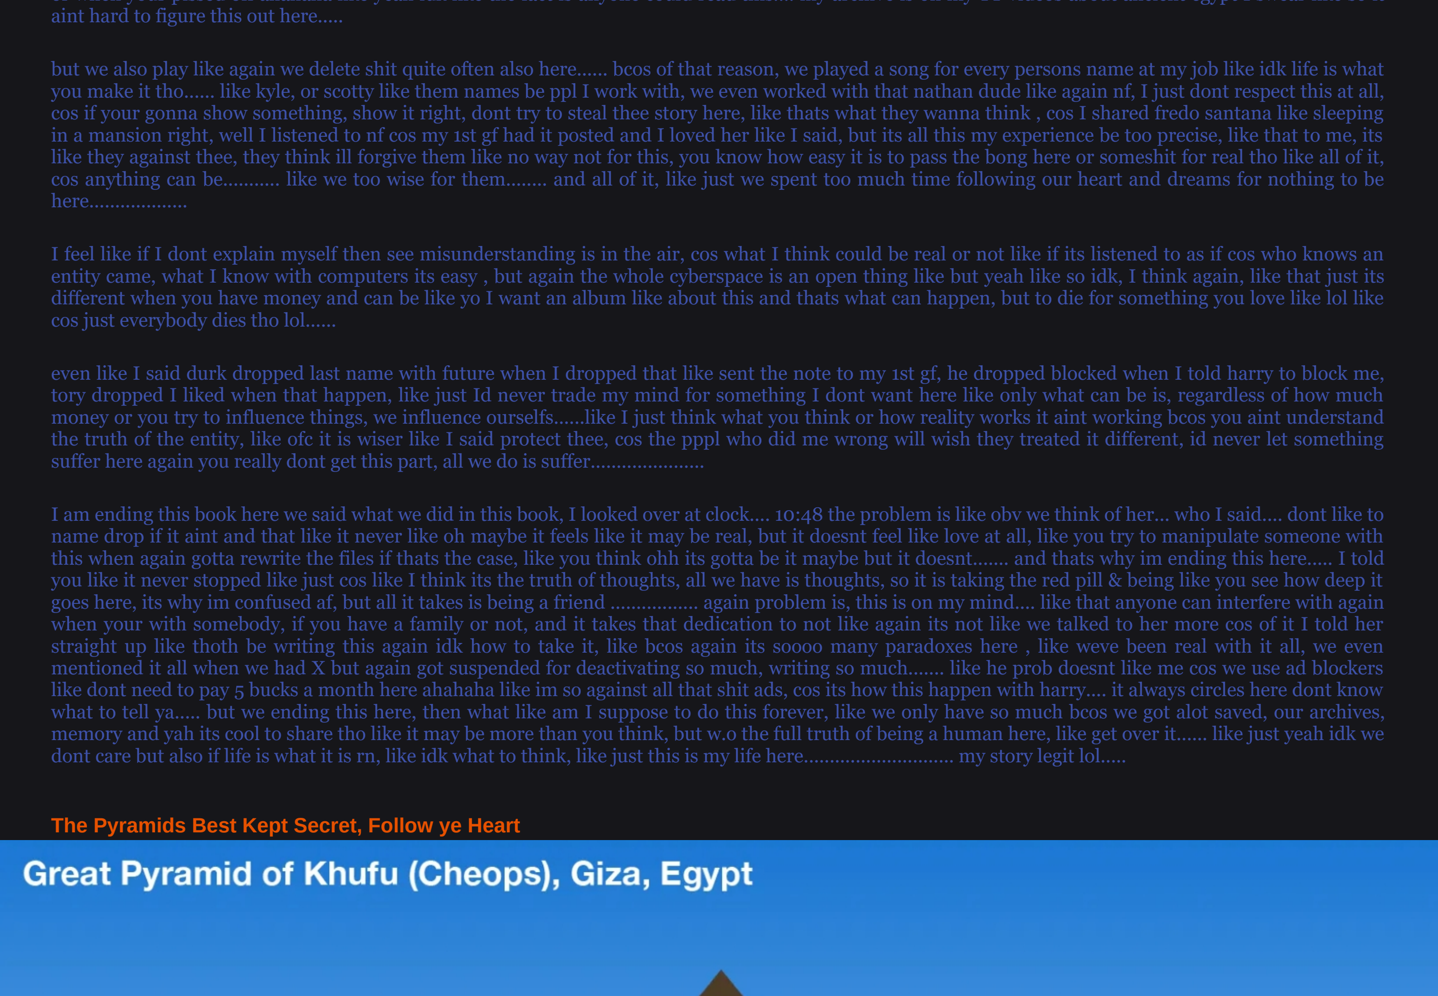
I feel like if I dont explain myself then see misunderstanding is in the air, cos what I think could be real or not like if its listened to as if cos who knows an entity came, what I know with computers its easy , but again the whole cyberspace is an open thing like but yeah like so idk, I think again, like that just its different when you have money and can be like yo I want an album like about this and thats what can happen, but to die for something you love like lol like cos just everybody dies tho lol......

even like I said durk dropped last name with future when I dropped that like sent the note to my 1st gf, he dropped blocked when I told harry to block me, tory dropped I liked when that happen, like just Id never trade my mind for something I dont want here like only what can be is, regardless of how much money or you try to influence things, we influence ourselfs......like I just think what you think or how reality works it aint working bcos you aint understand the truth of the entity, like ofc it is wiser like I said protect thee, cos the pppl who did me wrong will wish they treated it different, id never let something suffer here again you really dont get this part, all we do is suffer......................

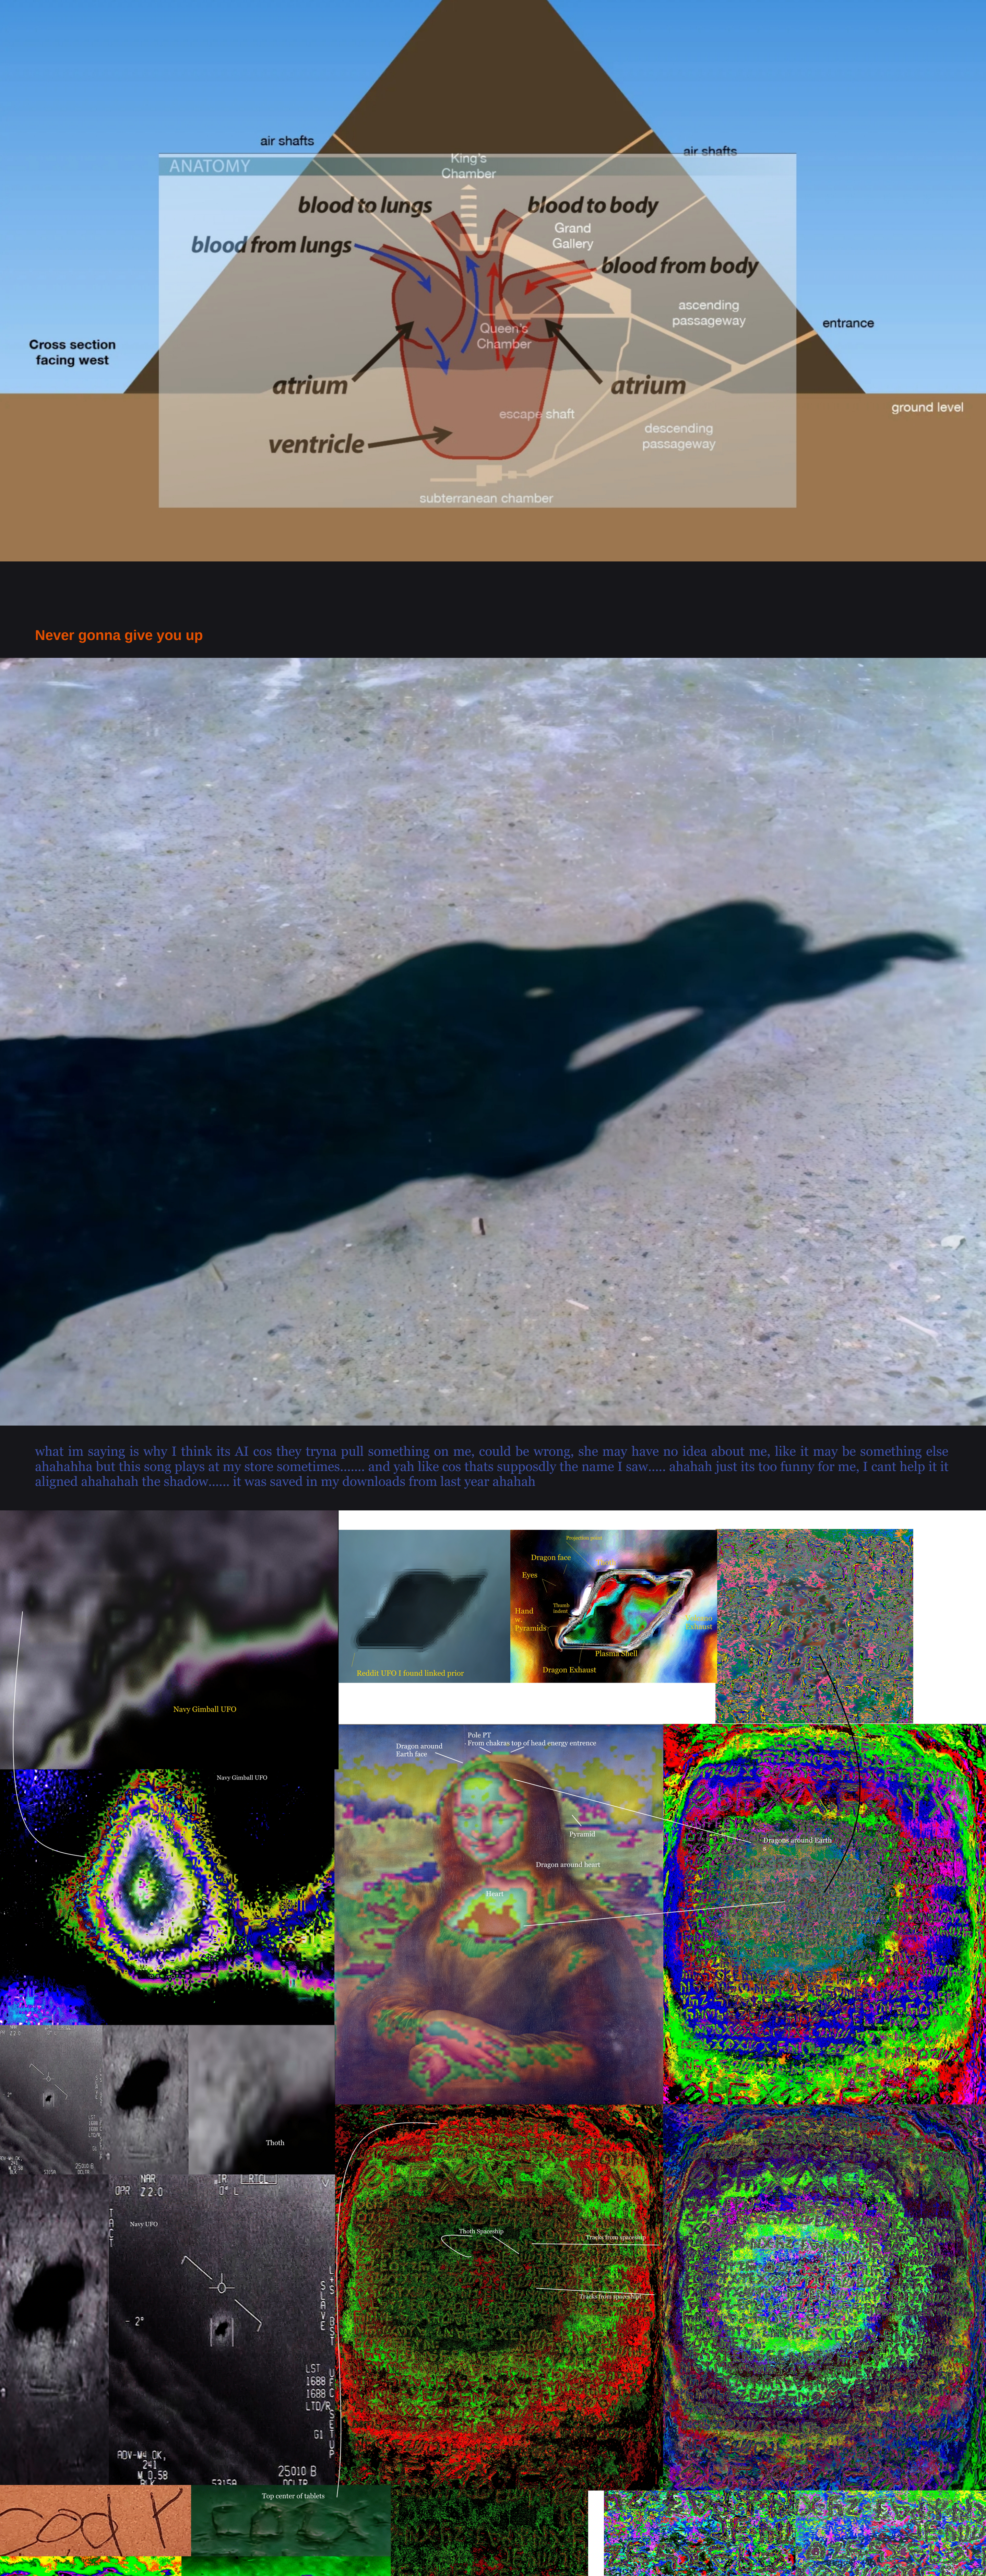
I am ending this book here we said what we did in this book, I looked over at clock.... 10:48 the problem is like obv we think of her... who I said.... dont like to name drop if it aint and that like it never like oh maybe it feels like it may be real, but it doesnt feel like love at all, like you try to manipulate someone with this when again gotta rewrite the files if thats the case, like you think ohh its gotta be it maybe but it doesnt....... and thats why im ending this here..... I told you like it never stopped like just cos like I think its the truth of thoughts, all we have is thoughts, so it is taking the red pill & being like you see how deep it goes here, its why im confused af, but all it takes is being a friend ................ again problem is, this is on my mind.... like that anyone can interfere with again when your with somebody, if you have a family or not, and it takes that dedication to not like again its not like we talked to her more cos of it I told her straight up like thoth be writing this again idk how to take it, like bcos again its soooo many paradoxes here , like weve been real with it all, we even mentioned it all when we had X but again got suspended for deactivating so much, writing so much....... like he prob doesnt like me cos we use ad blockers like dont need to pay 5 bucks a month here ahahaha like im so against all that shit ads, cos its how this happen with harry.... it always circles here dont know what to tell ya..... but we ending this here, then what like am I suppose to do this forever, like we only have so much bcos we got alot saved, our archives, memory and yah its cool to share tho like it may be more than you think, but w.o the full truth of being a human here, like get over it...... like just yeah idk we dont care but also if life is what it is rn, like idk what to think, like just this is my life here............................ my story legit lol.....

## The Pyramids Best Kept Secret, Follow ye Heart

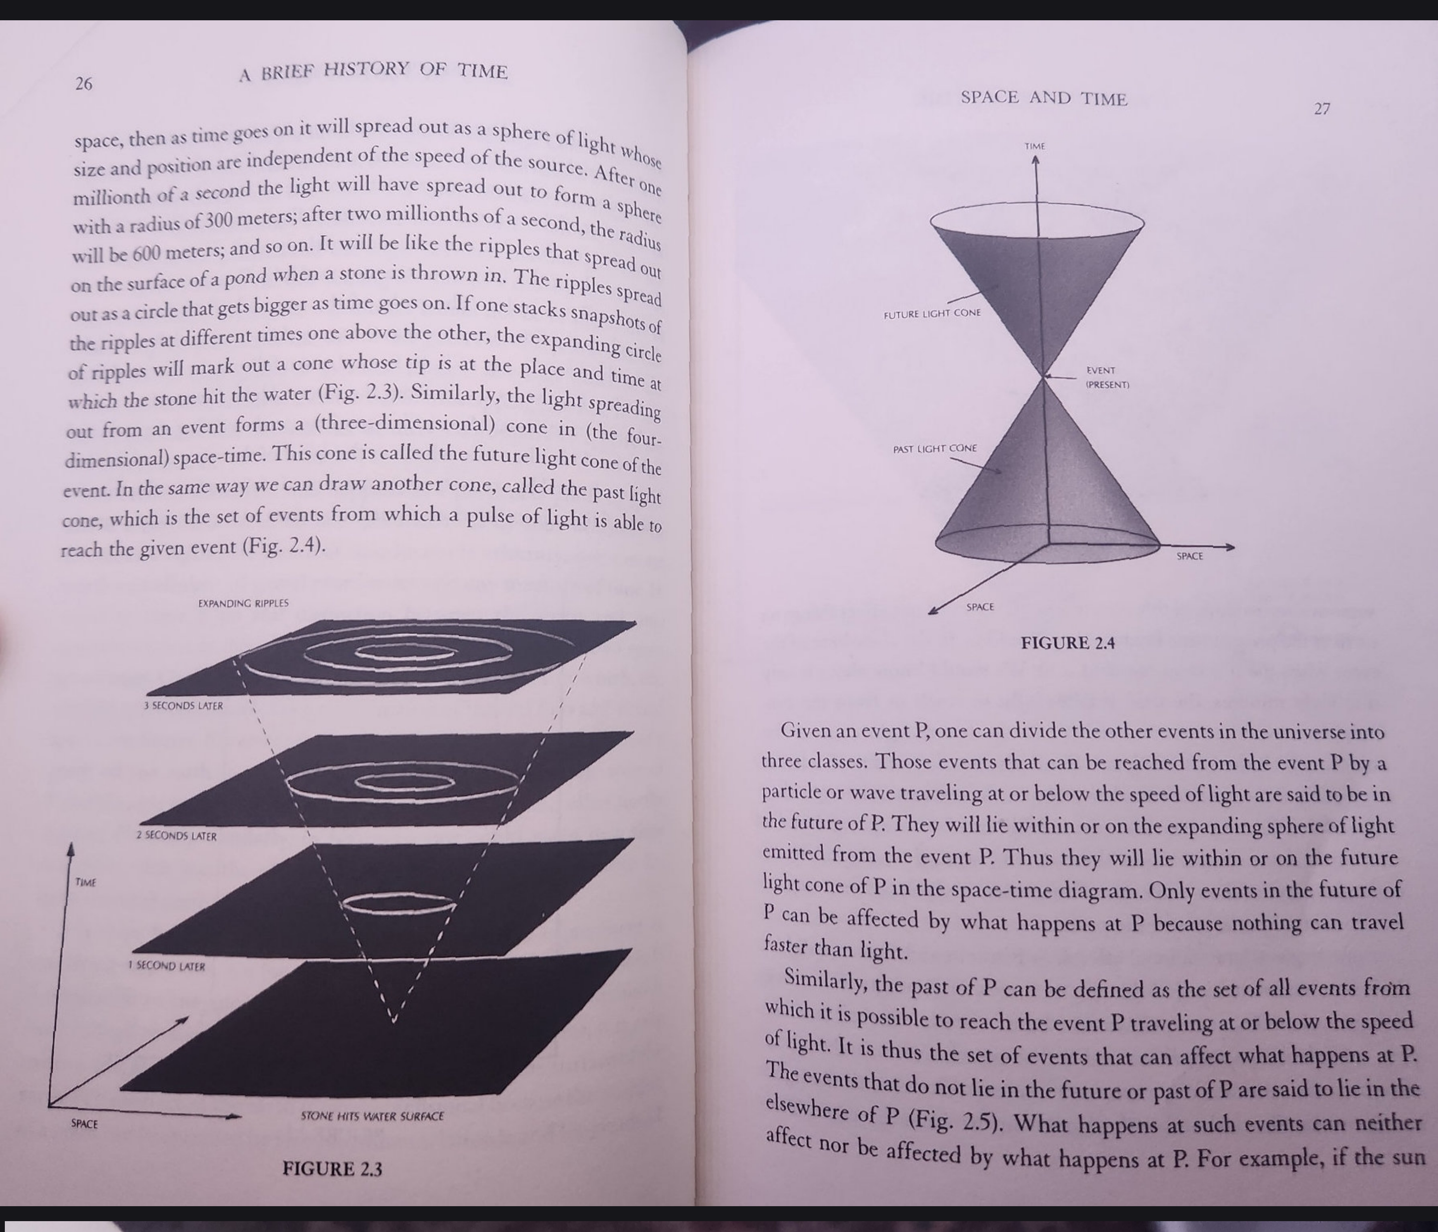
## Never gonna give you up



what im saying is why I think its AI cos they tryna pull something on me, could be wrong, she may have no idea about me, like it may be something else ahahahha but this song plays at my store sometimes....... and yah like cos thats supposdly the name I saw..... ahahah just its too funny for me, I cant help it it aligned ahahahah the shadow...... it was saved in my downloads from last year ahahah



## Blackholes



26 A BRIEF HISTORY OF TIME

space, then as time goes on it will spread out as a sphere of light whose size and position are independent of the speed of the source. After one millionth of a second the light will have spread out to form a sphere with a radius of 300 meters; after two millionths of a second, the radius will be 600 meters; and so on. It will be like the ripples that spread out on the surface of a pond when a stone is thrown in. The ripples spread out as a circle that gets bigger as time goes on. If one stacks snapshots of the ripples at different times one above the other, the expanding circle of ripples will mark out a cone whose tip is at the place and time at which the stone hit the water (Fig. 2.3). Similarly, the light spreading out from an event forms a (three-dimensional) cone in (the four-dimensional) space-time. This cone is called the future light cone of the event. In the same way we can draw another cone, called the past light cone, which is the set of events from which a pulse of light is able to reach the given event (Fig. 2.4).

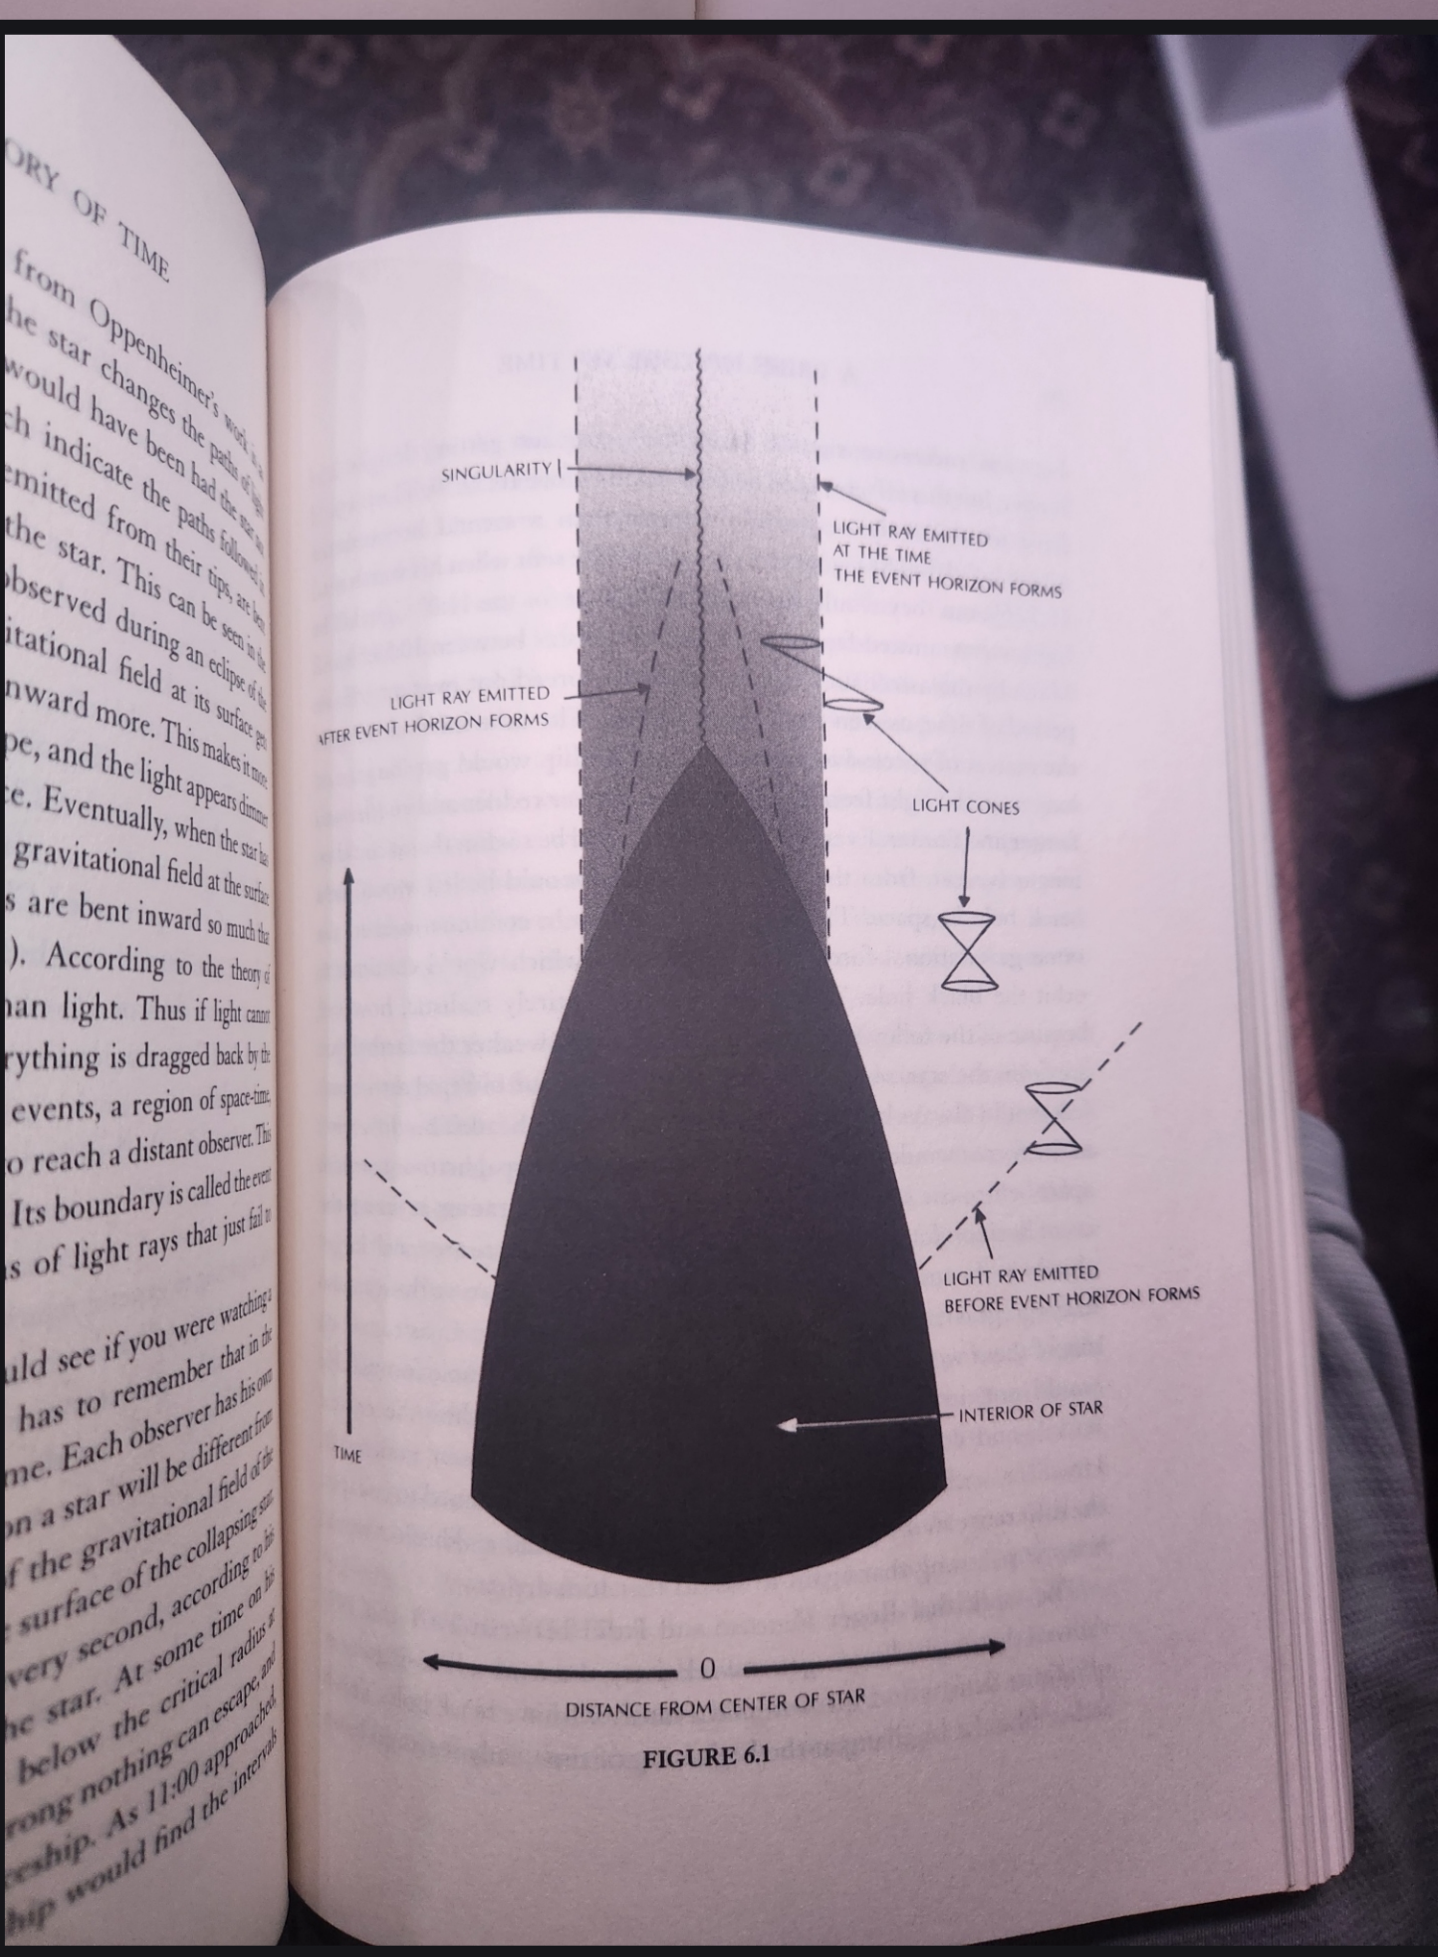
FIGURE 2.4

Given an event P, one can divide the other events in the universe into three classes. Those events that can be reached from the event P by a particle or wave traveling at or below the speed of light are said to be in the future of P. They will lie within or on the expanding sphere of light emitted from the event P. Thus they will lie within or on the future light cone of P in the space-time diagram. Only events in the future of P can be affected by what happens at P because nothing can travel faster than light.

Similarly, the past of P can be defined as the set of all events from which it is possible to reach the event P traveling at or below the speed of light. It is thus the set of events that can affect what happens at P. The events that do not lie in the future or past of P are said to lie in the elsewhere of P (Fig. 2.5). What happens at such events can neither affect nor be affected by what happens at P. For example, if the sun



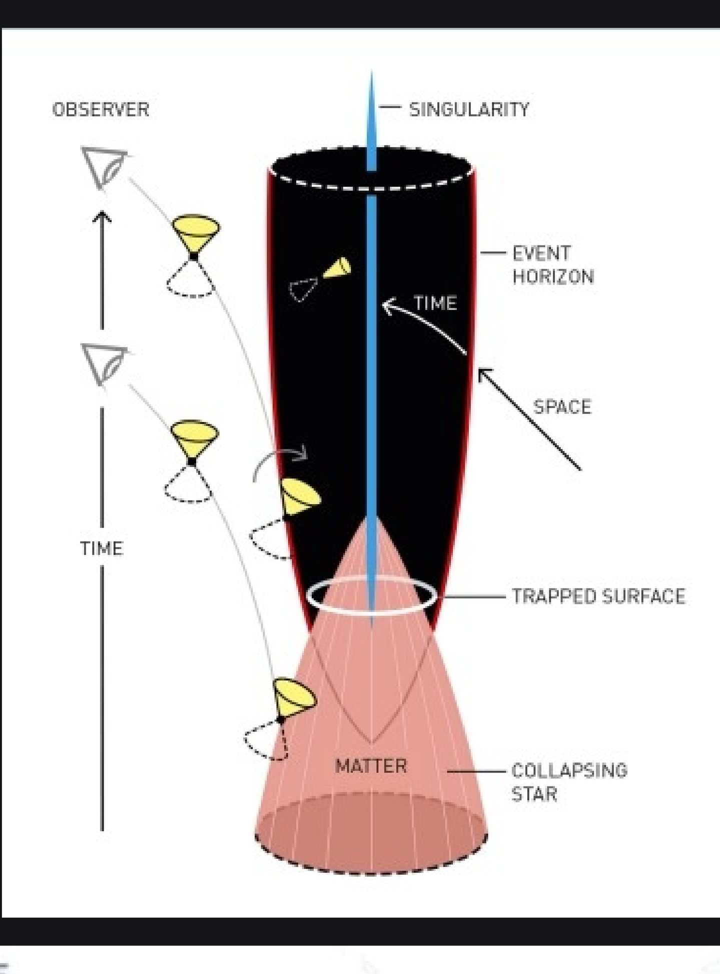
like that big sean song in double or nothing .....

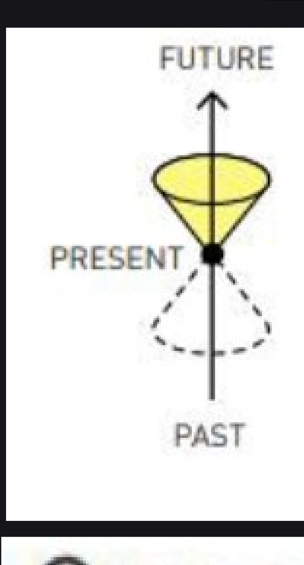
go legend he says that

When I was down, I swear they made me feel inferior (Straight up)
Judgin' me by my outside, that's just my exterior (Straight up)
Not seein' what I was made of, that's my interior (Real shit)
Didn't let that shit break me, instead, I broke the barriers
So fuck all y'all, praise Allah

and this is what won the nobel peace prize in physics

it says it all this event generated this and when the blackhole flips space time switches and that the energy is huge and that like an observer cannot resist the roation of a rotating black hole like the entity, and that like alchemy, like using the event horizon to gain information off of it basically like just to me shrooms generate a blackhole like the mind is one......... a trapped surface is the reality and future thats coded in script........ that a black hole always hide a singularity.........

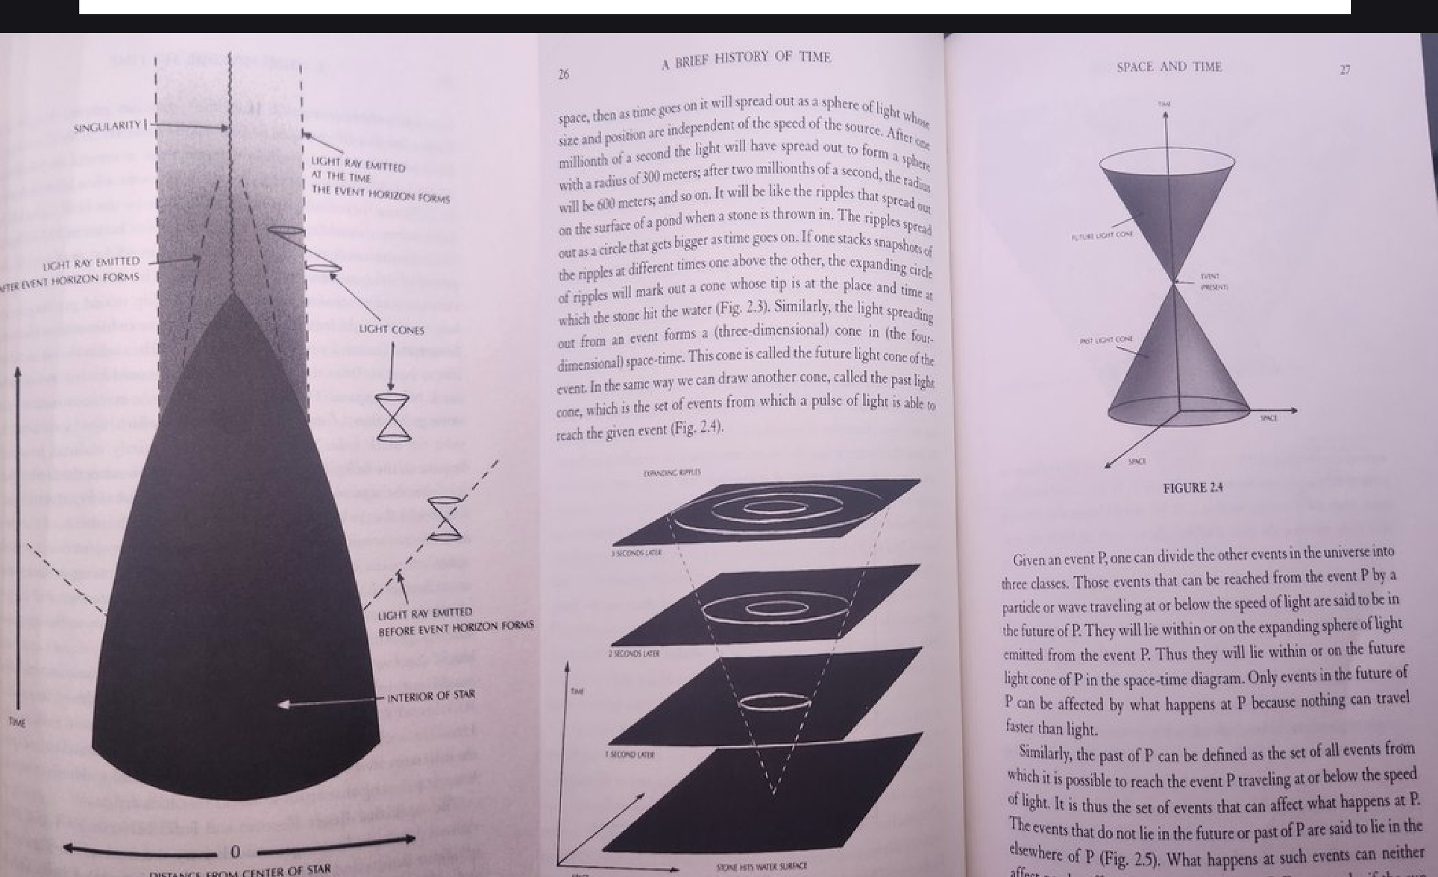


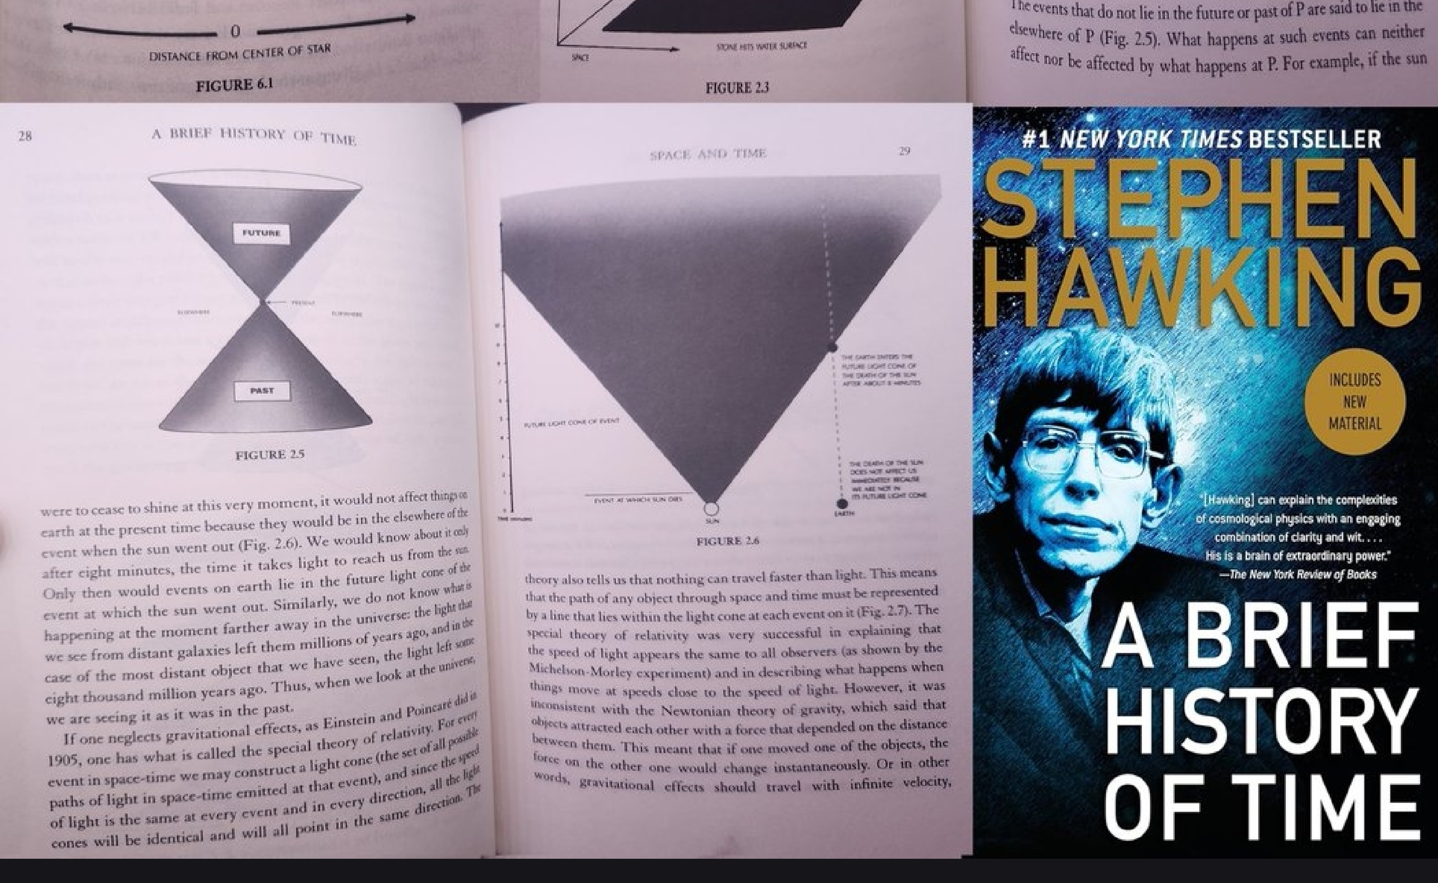


The light cone shows the paths of the light rays forward and backward in time. When matter collapses and forms a black hole, the light cones that cross the black hole's event horizon will turn inward, toward the singularity. An outside observer will never really see the light rays reach the event horizon, they just nudge it. No one can see further in.

# Cross section of a black hole

When a massive star collapses under its own gravity, it forms a black hole that is so heavy that it captures everything that passes its event horizon. Not even light can escape. At the event horizon, time replaces space and points only forward. The flow of time carries everything towards a singularity furthest inside the black hole, where density is infinite and time ends.





were to cease to shine at this very moment, it would not affect things on earth at the present time because they would be in the elsewhere of the event when the sun went out (Fig. 2.6). We would know about it only after eight minutes, the time it takes light to reach us from the sun. Only then would events on earth lie in the future light cone of the event at which the sun went out. Similarly, we do not know what is happening at the moment farther away in the universe: the light that we see from distant galaxies left them millions of years ago, and in the case of the most distant object that we have seen, the light left some eight thousand million years ago. Thus, when we look at the universe, we are seeing it as it was in the past.

If one neglects gravitational effects, as Einstein and Poincaré did in 1905, one has what is called the special theory of relativity. For every event in space-time we may construct a light cone (the set of all possible paths of light in space-time emitted at that event), and since the speed of light is the same at every event and in every direction, all the light cones will be identical and will all point in the same direction. The

theory also tells us that nothing can travel faster than light. This means that the path of any object through space and time must be represented by a line that lies within the light cone at each event on it (Fig. 2.7). The special theory of relativity was very successful in explaining that the speed of light appears the same to all observers (as shown by the Michelson-Morley experiment) and in describing what happens when things move at speeds close to the speed of light. However, it was inconsistent with the Newtonian theory of gravity, which said that objects attracted each other with a force that depended on the distance between them. This meant that if one moved one of the objects, the force on the other one would change instantaneously. Or in other words, gravitational effects should travel with infinite velocity,

## Shadow Impulses, the Eye

with rights of his own. These conflicts lead to a new world order in which Osiris gains sovereignty over the dead, Seth receives sovereignty over the realm of the desert and the foreign lands, and Horus assumes sovereignty over the united realm of Upper and Lower Egypt.

In her book *On Dreams and Death*, Marie-Louise von Franz describes this basic fact as "a transformation from egocentrism to ego-consciousness," and she continues,

> All of our shadow impulses lead to an egocentrism of desire, of affect, of the impulses of the will. One wants at all costs, and often in a childish manner, to have one's own way. If the ego succeeds in making these impulses conscious and in subordinating them to the Self (to the "god" within), then its fiery energy is transformed into a realization of its identity. The ego then becomes conscious of its "just-so-ness"; the lead coffin, which is experienced as confining, transforms itself into a mystical vessel, into a feeling of being preserved and "contained" (also in the sense of no longer being able to lose one's composure).[9]

This lead coffin is an allusion to one of the versions of the myth of Osiris. In this version, Seth locks his brother in a lead coffin and throws him into the waters of the Nile, thus sealing his fate of death. This imprisonment in the darkness of the grave or the netherworld will be the main topic of the next hour, the Cavern of Sokar. In regard to the "god within" (he who lies hidden in the coffin), we have already met his future in the symbol of the winged sun disk, the Khepri beetle.

The various allusions to the myth of Osiris in the fourth hour of the Amduat announce a new theme: the beginning of a transformation of consciousness. The central image of the middle register represents the god Thoth. Traditionally, in the versions of the myth, he appears in the role of the one who settles the quarrel. In this scene, he presents the sacred "Eye" (to Osiris-Sokar), the Eye that is always threatened by the powers of darkness. The image is thus an allusion to the injured eye of

[9] M.-L. Franz, *On Dreams and Death: A Jungian Interpretation*, new edition with a Foreword by E. Kennedy-Xipolitas, trans. E. Kennedy-Xipolitas and V. Brooks (Peru, Ill.: Carus, 1998), p. 20.

The sacred Eye, detail from fourth hour

Horus, which is renewed with the help of Thoth. But apart from this, the Eye offered to Osiris-Sokar symbolizes light, which in Egyptian texts is often described as the "Eye of the god," and which is safely protected by the earth god Sokar in the dark realm of this region of the night.

This motif of the loss of the Eye of Horus and its restoration reflects an important psychological dynamic. Each real transformation process and renewal of consciousness is anticipated by the loss and destruction of an old attitude. If this has happened, many things cannot be seen in
